### *Section 2 – Shipping & Packaging Information*

2.1) Shipping Volume & Frequency 2700-3000 tons

☒ One Time Only ☐ Year ☐ Quarter ☐ Month

2.2) DOT Shipping Name RQ, NA3077, Hazardous Waste Solid, n.o.s. (D008, lead) PG III

2.3) Is this waste surcharge exempt? ☒ Yes ☐ No

If yes, please attach a surcharge exemption form, found in Section 2 of the EQ Resource Guide.

2.4) Packaging **(check all that apply)**

☐ Bulk Solid ($Yd^3$ < 2000 lbs/$yd^3$)
☒ Bulk Solid (Ton >2000 lbs/$yd^3$)
☐ Bulk Liquids (Gallon)
☐ Totes, Size
☐ Cubic Yard Boxes/Bags
☐ Drums, Size
☐ Other (palletized, 5 gal. Pail, etc.)

Quoted bulk disposal charges for solid materials will be billed by the cubic yard, if the waste density is less than 2,000lbs./cubic yard. If waste density is greater than 2,000 lbs./cubic yard, then bulk disposal charges will be billed by the ton, regardless of the approved container.

© EQ-The Environmental Quality Company

## *Section 3 – Physical Characteristics*

3.1) Color Brown/Gray 3.2) Odor None

3.3) Does this waste contain any "Potentially Odorous Constituents" as defined in the EQ Resource Guide? (Section 3) ☐ Yes ☒ No

| | | | | | |
|---|---|---|---|---|---|
| 3.4) Physical State at 70°F: | ☒ Solid | ☐ Dust/Powder | ☐ Liquid | ☐ Sludge | |
| 3.5) What is the pH of this waste? | ☐ ≤2 | ☒ 2.1-4.9 | ☐ 5-10 | ☐ 10.1-12.4 | ☐ ≥12.5 |
| 3.6) What is the flash point of this waste? | ☐ <90°F | ☐ 90-140°F | ☐ 140-199°F | ☒ >200°F | |
| 3.7) Does this waste contain? **(check all that apply)** | | ☐ **None** | ☐ Free Liquids | ☐ Oily Residue | ☐ Metal Fines |
| ☐ Biodegradable Sorbants | ☐ Amines | ☐ Ammonia | ☐ Water Reactive | ☐ Biohazard | ☐ Aluminum |
| ☐ Shock Sensitive Waste | ☐ Reactive Waste | ☐ Radioactive Waste | ☒ Explosives | ☐ Pyrophoric Waste | ☐ Isocyanates |
| ☐ Asbestos – non-friable | ☐ Asbestos – friable | ☒ Dioxins | ☒ Furans | **TRACE amounts ONLY** see data | |

## *Section 4 – Waste Composition and Generating Process*

4.1) Describe the physical composition of the waste (i.e., soil, water, PPE, debris, key chemical compounds, etc.)

Soil 95 to 100 % TCLP Lead 7.9 mg/L to 8.4 mg/L %

PPE Expendables 0 to 5 % Total Lead 0 to 1.5 %

**Total: 100%**

4.2) Provide a *detailed* description of the process generating this waste (attach flow diagram if available).
Removal of two unlined earthen ponds associated with the on-site incineration of explosive waste. The ponds received scrubber and precooler quench water from the air pollution control devices for the incinerator exhaust

## *Section 5 – Is This Hazardous Waste?*

*Please refer to Section 5 of the EQ Resource Guide for a list of waste codes*

| **As determined by 40 CFR, Part 261 and State Rules:** | | | **Please list applicable waste code(s):** |
|---|---|---|---|
| 5.1) Is this an EPA RCRA listed hazardous waste (F, K, P or U)? | ☐ Yes | ☒ No | |
| 5.2) Is this an EPA RCRA characteristic hazardous waste (D001-D043)? | ☒ Yes | ☐ No | D008 |
| 5.3) Do any State Hazardous Waste Codes apply? | ☐ Yes | ☒ No | |
| 5.4) Is this waste intended for wastewater treatment? | ☐ Yes* | ☒ No | |

***If you answered 'no' to 5.1, 5.2, and 5.3, please skip to Section 7. *If you answered 'yes' to 5.4, please attach the Waste Characterization Report Addendum found in Section 7 of the EQ Resource Guide.***

## *Section 6 – Hazardous Wastes*

| | | |
|---|---|---|
| 6.1) Does this waste exceed Land Disposal Restriction levels? | ☒ Yes | ☐ No |
| 6.1a) If this waste stream is greater than 50% soil, does it meet the alternative soil treatment standards of 40 CFR 268.49? | ☐ Yes | ☒ No |
| 6.1b) Does this waste contain greater than 50% debris, by volume? (Debris is greater than 2.5 inches in size.) | ☐ Yes | ☒ No |
| 6.2) Is the waste an oxidizer (D001)? | ☐ Yes | ☒ No |
| 6.3) Does this waste contain reactive cyanide ≥ 250 ppm (D003)? | ☐ Yes | ☒ No |
| 6.4) Does this waste contain reactive sulfide ≥ 500 ppm (D003)? | ☐ Yes | ☒ No |

6.5) Please indicate which constituent concentrations are below or above the regulatory level. Please indicate the basis used in the determination. Either "Below" or "Above" **MUST** be checked for each constituent.

**Based On:** ☒ **Generator Knowledge** ☒ **Analysis*** ☐ **MSDS***
***Please attach a copy. Analysis or MSDS are required for EQFL Non-hazardous wastes.**

| Code | | Regulatory Level TCLP (mg/l) | Concentration (if above) | Code | | Regulatory Level TCLP (mg/l) | Concentration (if above) |
|---|---|---|---|---|---|---|---|
| D004 | Arsenic | 5 | ☒ Below ☐ Above | D024 | m-Cresol | 200 | ☐ Below ☐ Above |
| D005 | Barium | 100 | ☒ Below ☐ Above | D025 | p-Cresol | 200 | ☐ Below ☐ Above |
| D006 | Cadmium | 1 | ☒ Below ☐ Above | D026 | Cresols | 200 | ☐ Below ☐ Above |
| D007 | Chromium | 5 | ☒ Below ☐ Above | D027 | 1,4-Dichlorobenzene | 7.5 | ☐ Below ☐ Above |
| D008 | Lead | 5 | ☐ Below ☒ Above 8.4 mg/L | D028 | 1,2-Dicholoroethane | 0.5 | ☐ Below ☐ Above |
| D009 | Mercury | 0.2 | ☒ Below ☐ Above | D029 | 1,1-Dichloroethylene | 0.7 | ☐ Below ☐ Above |
| D010 | Selenium | 1 | ☒ Below ☐ Above | D030 | 2,4-Dinitrotoluene | 0.13 | ☐ Below ☐ Above |
| D011 | Silver | 5 | ☒ Below ☐ Above | D031 | Heptachlor | 0.008 | ☐ Below ☐ Above |
| D012 | Endrin | 0.02 | ☐ Below ☐ Above | D032 | Hexachlorobenzene | 0.13 | ☐ Below ☐ Above |
| D013 | Lindane | 0.4 | ☐ Below ☐ Above | D033 | Hexachlorobutadiene | 0.5 | ☐ Below ☐ Above |
| D014 | Methoxychlor | 10 | ☐ Below ☐ Above | D034 | Hexachloroethane | 3.0 | ☐ Below ☐ Above |
| D015 | Toxaphene | 0.5 | ☐ Below ☐ Above | D035 | Methyl Ethyl Ketone | 200 | ☐ Below ☐ Above |
| D016 | 2,4-D | 10 | ☐ Below ☐ Above | D036 | Nitrobenzene | 2 | ☐ Below ☐ Above |
| D017 | 2,4,5-TP (Silvex) | 1 | ☐ Below ☐ Above | D037 | Pentachlorophenol | 100 | ☐ Below ☐ Above |
| D018 | Benzene | 0.5 | ☐ Below ☐ Above | D038 | Pyridine | 5 | ☐ Below ☐ Above |
| D019 | Carbon Tetrachloride | 0.5 | ☐ Below ☐ Above | D039 | Tetrachloroethylene | 0.7 | ☐ Below ☐ Above |
| D020 | Chlordane | 0.03 | ☐ Below ☐ Above | D040 | Trichloroethylene | 0.5 | ☐ Below ☐ Above |
| D021 | Chlorobenzene | 100 | ☐ Below ☐ Above | D041 | 2,4,5-Trichlorophenol | 400 | ☐ Below ☐ Above |
| D022 | Chloroform | 6.0 | ☐ Below ☐ Above | D042 | 2,4,6-Trichlorophenol | 2 | ☐ Below ☐ Above |
| D023 | o-Cresol | 200 | ☐ Below ☐ Above | D043 | Vinyl Chloride | 0.2 | ☐ Below ☐ Above |

6.6) If this is a characteristic hazardous waste, does it contain underlying hazardous constituents? ☒ Yes ☒ No
If yes, please list the constituents in Section 11.

## Section 7 – Non-Hazardous Wastes

*For a complete list of non-hazardous waste codes, please refer to Section 7 of the EQ Resource Guide*

**Please list applicable waste code:**

7.1) Is this a Michigan non-hazardous liquid industrial waste? ☐ Yes ☒ No
7.2) Is this a Universal waste? ☐ Yes ☒ No
7.3) Is this a Recyclable Commodity? (e.g.: computer monitors, free mercury, etc.) ☐ Yes ☒ No
7.4) Is this waste a recoverable petroleum product? ☐ Yes* ☒ No
7.5) Is this waste used oil as defined by 40 CFR Part 279? ☐ Yes* ☒ No

***If you answered 'yes' to questions 7.4 or 7.5 please attach the Waste Characterization Report Addendum found in Section 7 of the EQ Resource Guide.***

## Section 8 – TSCA Information

8.1) What is the concentration of PCBs in the waste? ☒ None ☐ 0-5 ppm ☐ 6-49 ppm ☐ 50-499 ppm ☐ 500+ ppm
8.2) Does the waste contain PCB contamination from a source with a concentration ≥ 50 ppm? ☐ Yes ☒ No
***If you answered "no" to 8.1 and 8.2, please skip to Section 9.***
8.3) Has this waste been processed into a non-liquid form? ☐ Yes ☐ No
If yes, what was the concentration of PCBs prior to processing? ☐ N/A ☐ 0-499 ppm ☐ 500+ ppm
8.4) Is the non-liquid PCB waste in the form of soil, rags, debris, or other contaminated media? ☐ Yes ☐ No
8.5) Are you a PCB capacitor manufacturer or a PCB equipment manufacturer? ☐ Yes ☐ No
8.6) Has the PCB Article (e.g., transformer, hydraulic machine, PCB-contaminated electrical equipment) been drained/flushed of all PCBs and decontaminated in accordance with 40 CFR 761.60(b)? ☐ N/A ☐ Yes ☐ No

## Section 9 – Clean Air Act Information

| NESHAP SIC* | | |
|---|---|---|
| 2812 | 2836 | 2875 |
| 2813 | 2841 | 2879 |
| 2816 | 2842 | 2891 |
| 2819 | 2843 | 2892 |
| 2821 | 2844 | 2893 |
| 2822 | 2851 | 2895 |
| 2823 | 2861 | 2899 |
| 2824 | 2865 | 2911 |
| 2833 | 2869 | 3312 |
| 2834 | 2873 | 4953 |
| 2835 | 2874 | 9511 |

9.1) Is this waste subject to regulation under 40 CFR, Part 63, Subpart DD or 40 CFR, Part 264, Subpart CC (RCRA)? ☐ Yes ☒ No
(Does the waste contain >500 ppm Volatile Organic Hazardous Air Pollutants – VOHAP's or Volatile Organic Compounds – VOC's?)
*For a complete list of VOHAP's, please see Section 11 of the EQ Resource Guide*
9.2) Is the site, or waste, subject to any other MACT or NESHAP? ☒ Yes, please specify: MANY, waste is not ☐ No
9.3) Does this waste stream contain Benzene? ☐ Yes ☒ No
***If you answered "no" to 9.3, please skip to Section 10.***
9.4) Does the waste stream come from a facility with one of the SIC/NAICS codes listed under the Benzene NESHAP identified in 40 CFR 61, Subpart FF? ☐ Yes ☐ No
9.5) Is the generating source of this waste stream a facility with Total Annual Benzene (TAB) ≥10 Mg/year? ☐ Yes ☐ No
For assistance in calculating the TAB, please see the TAB Worksheet in Section 9 of the EQ Resource Guide.
***If you answered "no" to question 9.4 and 9.5, please skip to Section 10.***
9.6) Does the waste contain >10% water? ☐ Yes ☐ No
9.7) What is the TAB quantity for your facility? _____Mg/Year
9.8) Does the waste contain >1.0 mg/kg total Benzene? ☐ Yes ☐ No
9.9) What is the total Benzene concentration in your waste? _____Percent or _____ ppmw.

***(Supporting analysis must be attached. Do not use TCLP analytical results. Acceptable laboratory methods include 8020, 8240, 8260, 602 and 624.)***
*For a list of NAICS codes, please refer to Section 9 of the EQ Resource Guide.

## Section 10 – Fuel Blending Information

10.1) Is this waste intended for fuel blending? ☐ Yes* ☒ No
*If yes, Heat value (BTU/lb.) Chlorine (%) Water (%) Solids (%)
10.2) Is this waste intended for reclamation? ☐ Yes ☐ No (5-Gallon Sample required for all reclaim waste streams)

## Section 11 – Constituent Information

Please identify your waste constituents from these four categories: ***Underlying Hazardous Constituents (UHC's), Volatile Organic Hazardous Air Pollutants (VOHAP's), Volatile Organic Compounds (VOC's) and Toxic Release Inventory Constituents (TRI)***

| Constituent | Concentration | UHC? | Constituent | Concentration | UHC? |
|---|---|---|---|---|---|
| Arsenic | 7.3 mg/kg | ☒ Yes ☐ No | | | ☐ Yes ☐ No |
| Chromium | 95.1 mg/kg | ☒ Yes ☐ No | | | ☐ Yes ☐ No |
| | | ☐ Yes ☐ No | | | ☐ Yes ☐ No |
| | | ☐ Yes ☐ No | | | ☐ Yes ☐ No |
| | | ☐ Yes ☐ No | | | ☐ Yes ☐ No |

*Please see Section 11 of the EQ Resource Guide for a list of UHC's, VOHAP's and VOC's. For a complete list of TRI constituents, please refer to 40 CFR 372.65.*

## Section 12 – Certification

I certify that all information (including attachments) is complete and factual and is an accurate representation of the known and suspected hazards, pertaining to the waste described herein. I authorize EQ's Resource Team to add supplemental information to the waste approval file, provided I am contacted and give verbal permission. I authorize EQ's Resource Team to obtain a sample from any waste shipment for purposes of verification and confirmation. I agree that, if EQ approves the waste described herein, all such wastes that are transported, delivered, or tendered to EQ by Generator or on Generator's behalf shall be subject to, and Generator shall be bound by, the attached Standard Terms and Conditions.

Generator Signature _____ Printed Name Jeremy Flint

Company Alliant Techsystems, Inc. (RFAAP) Title Environmental Engineer Date March 6, 2009

*The generator's signature MUST appear on the EQ Waste Characterization Report. If the generator has authorized a third party to certify this document, a written notice (on generator letterhead) must accompany this submittal. Although the EQ Resource Team is authorized to make certain modifications to the information provided on this form, the addition or removal of waste codes and waste constituents must be documented by the generator.*

© EQ-The Environmental Quality Company

## STANDARD TERMS AND CONDITIONS

The Agreement between the Customer and EQ – The Environmental Quality Company and/or its member companies (hereinafter "EQ") related to or associated with Delivered Waste, as herein defined, shall be governed by the following Standard Terms and Conditions in addition to the terms and conditions contained in any Waste Characterization Report, Customer Approval Quote Confirmation, Generator Approval Notification, Notice of Waste Approval Expiration, and/or Credit Agreement associated with such Delivered Waste.

The Customer may use its standard forms (such as purchase orders, acknowledgments of orders, and invoices) to administer its dealings under this Agreement for convenience purposes, but all provisions thereof in conflict with these terms and conditions shall be deemed stricken.

**Definitions**

The following definitions shall apply for purposes of this Agreement:

**"Acceptable Waste"** shall mean any hazardous waste, as defined under applicable State or federal law, determined by EQ as acceptable for treatment and/or disposal in accordance with this Agreement.

**"Delivered Wastes"** shall mean all wastes (i) which are transported, delivered, or tendered to EQ by the Customer; (ii) which the Customer has arranged for the transport, delivery or tender to EQ; or (iii) ) which are transported, delivered, or tendered to EQ under a Credit Agreement between the Customer and EQ.

**"Non-Conforming Wastes"** shall mean wastes that (a) are not in accordance in all material respects with the warranties, descriptions, specifications or limitations stated in the Waste Characterization Report and this Agreement; (b) have constituents or components of a type or concentration not specifically identified in the Waste Characterization Report (i) which increase the nature or extent of the hazard and risk undertaken by EQ in treating and/or disposing of the waste, or (ii) for whose treatment and/or disposal a Waste Management Facility is not designed or permitted, or (iii) which increase the cost of treatment and/or disposal of waste beyond that specified in EQ's price quote; or (c) are not properly packaged, labeled, described, or placarded, or otherwise not in compliance with United States Department of Transportation and United States Environmental Protection Agency regulations.

**Control of Operations**.

EQ shall have sole control over all aspects of the operation of any treatment and/or disposal facility of EQ receiving Delivered Wastes under this Agreement (hereinafter, "Waste Management Facility"), including, without limitation, maintaining EQ's desired volume of Acceptable Wastes being delivered to any Waste Management Facility by the Customer or any other person or entity.

**Identification of Waste**.

For each waste material to be transported, delivered, or tendered to EQ under this Agreement, the Customer shall provide, or cause to be provided, to EQ a representative sample of the waste material and a completed Waste Characterization Report containing a physical and chemical description or analysis of such waste material, which description shall conform with any and all guidelines for waste acceptance provided by EQ. On the basis of EQ's analysis of such representative sample of the waste material and such Waste Characterization Report, EQ will determine whether such wastes are Acceptable Wastes. EQ does not make any guarantee that it will handle any waste material or any particular quantity or type of waste material, and EQ reserves the right to the decline to transport, treat and/or dispose of waste material. The Customer shall promptly furnish to EQ any information regarding known, suspected or planned changes in the composition of the waste material. Further, the Customer shall promptly inform EQ of any change in the characteristic or condition of the waste material which becomes known to the Customer subsequent to the date of the Waste Characterization Report.

**Non-Conforming Wastes**.

In the event that EQ at any time discovers that any Delivered Waste is Non-Conforming Waste, EQ may reject or revoke its acceptance of the Non-Conforming Waste. The Customer shall have seven (7) days to direct an alternative lawful manner of disposition of the waste, unless it is necessary by reason of law or otherwise to move the Non-Conforming Waste prior to expiration of the seven (7) day period. If the Customer does not direct an alternative disposal, at its option, EQ may return any such Non-Conforming Wastes to the Customer, and the Customer shall pay or reimburse EQ for all costs and expenses incurred by EQ in connection with the receipt, handling, sampling, analyses, transportation and return to the Customer of such Non-Conforming Wastes. If it is impossible or impractical for EQ to return the Non-Conforming Waste to the Customer, the Customer shall reimburse EQ for all costs, of any type or nature whatsoever, incurred by EQ, solely because such Delivered Waste was Non-Conforming Waste (including, but not limited to, all costs associated with any remedial steps necessary, due to the nature of the Non-Conforming Waste, in connection with material with which the Non-Conforming Waste may have been commingled and all expenses and charges for analyzing, handling, locating, preparing for transporting, storing and disposing of any Non-Conforming Waste).

**Customer Warranty - Acceptable Wastes**.

All Delivered Wastes shall be Acceptable Wastes and shall conform in all material respects to the description and specifications contained in the Waste Characterization Report. The information set forth in the Waste Characterization Report or any manifest, placard or label associated with any Delivered Wastes, or otherwise represented by the Customer or the generator (if other than the Customer) to EQ, is and shall be true, accurate and complete as of the date of receipt of the involved waste by EQ.

**Customer Warranty - Title to Wastes**.

Either the Customer or the generator (if other than the Customer) shall hold clear title, free of any all liens, claims, encumbrances, and charges to Delivered Waste until such waste is accepted by EQ.

**Customer Warranty - Compliance with Laws**.

The Customer shall comply with all applicable federal, state and local environmental statutes, regulations, and other governmental requirements, as well as directives issued by EQ from time to time, governing the transportation, treatment and/or disposal of Acceptable Wastes, including, but not limited to, all packaging, manifesting, containerization, placarding and labeling requirements.

**Customer Warranty - Updating Information**.

If the Customer receives information that Delivered Waste or other hazardous waste described in the Waste Characterization Report, or some component of such waste, presents or may present a hazard or risk to persons, property or the environment which was not disclosed to EQ, or if the Customer or generator (if other than the Customer) has changed the process by which such waste results, the Customer shall promptly report such information to EQ in writing.

**Customer Indemnity**.

The Customer shall indemnify, defend and hold harmless EQ, and its affiliated or related companies, and all of their respective present or future officers, directors, shareholders, employees and agents from and against any and all losses, damages, liabilities, penalties, fines, forfeitures, demands, claims, causes of action, suits, costs and expenses (including, but not limited to, reasonable costs of defense, settlement, and reasonable attorneys' fees), which may be asserted against any or all of them by any person or any governmental agency, or which any or all of them may hereafter suffer, incur, be responsible for or pay out, as a result of or in connection with bodily injuries (including, but not limited to, death, sickness, disease and emotional or mental distress) to any person (including EQ's employees), damage (including, but not limited to, loss of use) to any property (public or private), or any requirements to conduct or incur expense for investigative, removal or remedial expenses in connection with contamination of or adverse effect on the environment, or any violation or alleged violation of any statues, ordinances, orders, rules or regulations of any governmental entity or agency, caused or arising out of (i) a breach of this Agreement by the Customer, (ii) the failure of any warranty of the Customer to be true, accurate and complete, or (iii) any willful or negligent act or omission of the Customer, or its employees or agents in connection with the performance of this Agreement.

**Force Majeure**

EQ shall not be liable for any failure to accept, receive, handle, treat, and/or dispose of Delivered Waste due to an act of God, fire, casualty, flood, war, strike, lockout, labor trouble, failure of public utilities, equipment failure, facility shutdown, injunction, accident, epidemic, riot, insurrection, destruction of operation or transportation facilities, the inability to procure materials, equipment, or sufficient personnel or energy in order to meet operational needs without the necessity of allocation, the failure or inability to obtain any governmental approvals or to meet Environmental Requirements (including, but not limited to voluntary or involuntary compliance with any act, exercise, assertion, or requirement of any governmental authority) which may temporarily or permanently prohibit operations of EQ, the Customer, or the Generator, or any other circumstances beyond the control of EQ which prevents or delays performance of any of its obligations under this Agreement.

**Governing Laws**

This Agreement shall in all respects be governed by and shall be construed in accordance with the laws of the State of Michigan applied to contracts executed and performed wholly within such state.

# Attachment 1
## Comparison of ProUCL and RISK2000 UCL-Based Exposure Point Concentrations Used in the SWMU 39 HHRA

| Exposure Point | Chemical of Potential Concern | Maximum Concentration (Qualifier) | ProUCL Exposure Point Concentration [1] | | | Risk 2000 Exposure Point Concentration [2] | | |
|---|---|---|---|---|---|---|---|---|
| | | | Value | Units | Statistic | Value | Units | Statistic |
| Surface Soil (0-2') | TCDD-RME | 2.07E-05 | 2.89E-05[3] | mg/kg | Approx. Gamma | 2.07E-05 | mg/kg | Max |
| | Aluminum | 37400 | 25216 | mg/kg | Student-t | 25800 | mg/kg | 95%UCL-T |
| | Arsenic | 7.26 | 4.1 | mg/kg | Student-t | 5.4 | mg/kg | 95%UCL-T |
| | Chromium | 95.1 | 45.9 | mg/kg | Approx. Gamma | 46.8 | mg/kg | 95%UCL-T |
| | Copper | 375 | **351.8** | mg/kg | 99% Chebyshev | 117.7 | mg/kg | 95%UCL-BST |
| | Iron | 52800 | 34557.9 | mg/kg | Student-t | 35207.2 | mg/kg | 95%UCL-T |
| | Lead | 16500 | 10667.5 | mg/kg | 99% Chebyshev | 12841.9 | mg/kg | 95%UCL-T |
| | Manganese | 1380 | 689.4 | mg/kg | Approx. Gamma | 811.7 | mg/kg | 95%UCL-T |
| | Thallium | 22.7 | 17.0 | mg/kg | 99% Chebyshev | 4.3 | mg/kg | 95%UCL-BST |
| | Vanadium | 92.7 | 63.2 | mg/kg | Student-t | 63.2 | mg/kg | 95%UCL-N |
| Total Soil (0-10') | TCDD-RME | 2.07E-05 | 1.36E-05 | mg/kg | Approx. Gamma | 2.07E-05 | mg/kg | Max |
| | Aluminum | 37400 | 24904.3 | mg/kg | Student-t | 25200 | mg/kg | 95%UCL-T |
| | Arsenic | 7.26 | 3.8 | mg/kg | Approx. Gamma | 4.3 | mg/kg | 95%UCL-T |
| | Chromium | 95.1 | 42.4 | mg/kg | Approx. Gamma | 42.6 | mg/kg | 95%UCL-T |
| | Copper | 375 | **146.4** | mg/kg | 95% Chebyshev | 89.3 | mg/kg | 95%UCL-BST |
| | Iron | 52800 | 33794.8 | mg/kg | Student-t | 34156.2 | mg/kg | 95%UCL-T |
| | Lead | 16500 | **7350.8** | mg/kg | 99% Chebyshev | 1710 | mg/kg | 95%UCL-BST |
| | Manganese | 1380 | 572.3 | mg/kg | Approx. Gamma | 618.6 | mg/kg | 95%UCL-T |
| | Thallium | 22.7 | **11.8** | mg/kg | 99% Chebyshev | 3.1 | mg/kg | 95%UCL-BST |
| | Vanadium | 92.7 | 63.1 | mg/kg | Student-t | 63.1 | mg/kg | 95%UCL-N |

[1] ProUCL EPC UCL Statistics: Student's-t 95% UCL (Student-t); Approximate Gamma 95% UCL (Approx. Gamma); Chebyshev 95% UCL (95% Chebyshev); Chebyshev 99% UCL (99% Chebyshev).

[2] Risk 2000 EPC UCL Statistics: Maximum Detected Value (Max); 95% UCL of Normal Data (95% UCL-N); 95% UCL of Log-transformed Data (95% UCL-T); 95% UCL based on bootstrap statistic (95% UCL-Bst)

[3] Calculated ProUCL EPC value exceeds maximum detected concentration (MDC). The MDC would be selected as the EPC for the risk assessment.

NOTES:

**Bold** values indicate the ProUCL estimated EPC exceeds the Risk 2000 estimated EPC.

Non-detects: 1/2 detection limit was used for all NDs.

All bootstrap calulations use 5000 iterations.

mg/kg = milligram per kilogram.

**Thursday, April 16, 2009**

**Weather:**
Partly Cloudy/Warming (50-55 degrees)

**Description of Work:**
Crew arrived onsite at 0700, trucks already at Gate 10, held tailgate safety meeting and began checking in trucks.
9 trucks scheduled for today, also expecting Hertz JD 650 dozer to assist in excavating and consolidation
0745 began escorting trucks in and out of incinerator area for loading, all loaded and on the road without incident
Continued with the excavation, consolidating and sampling operations after loadout completed, out of site at 1600 hours
2 additional trucks showed up today and we loaded them this afternoon, 11 trucks in total today, leaves only 4 tomorrow.

**Tuesday, April 21, 2009**

**Weather:**
Partly Sunny/Warm (temp: 45-55 degrees)

**Description of Work:**
Crew on site at 0700, the incinerator is still down with a water leak, tailgate safety meeting held and work started for today
Continued excavation of the SSP and the transfer of the material to the NSP for consolidation into the northeast corner for loadout.
South Settling Pond (SSP) excavation has been completed (100%) need to finish with the sampling tomorrow morning.
Samples being taken and analyzed using the XRF machine as each 25 X 25 grid is complete, also every 20 linear feet along the berm.
Two samples came back above the clean up level and had to be over excavated an additional foot, resample was good.
15 trucks scheduled for tomorrow and incinerator will still be down so we'll not have to wait until 0800 to enter SWMU 39 to begin loading

**Tuesday, July 21, 2009**

**Weather:**
Cloudy/Humid 55-75 degrees

**Description of Work:**
Mobilized to FLFA and began excavation at the area.
Had plant utility people on site to help locate water line running along roadway to bottom of burn pit from top parking area
determined line below 1 foot level we are removing and will be cautious when digging near line
Stockpiling material at top of slope area for loadout beginning tomorrow
Walked burn pad to remove any debris which could puncture truck tires

**Wednesday, July 22, 2009**

**Weather:**
Partly Cloudy today 55-75 degrees

**Description of Work:**
On site at FLFA, tailgat held and work plan discussed with crew
Thompson trucking scheduled 6 trucks today, staggered 1 hour apart
Trucks are permitted 5% for hauling when not using interstate highway system which they will not to get to landfill
Weighing trucks before and after at ATK scalehouse by shipping and receiving
Continued excavating after loadout completed, discovered buried drum (30 gal) and stopped work, notified ATK and USACE and waited for response from Fire Dept and Safety Dept. Drum removed at ATK's direction and liquid sampled. Overpacked drum in a 55 gallon steel drum and moved to storage area, continued excavation after drum secured

## Site Safety Reports and Equipment Inspections

## Daily Safety Meeting

**Project Name:** Radford SWMU 51 **Date:** 2/16/09

**Project Number:** 123461 **Presented by:** Steve Kritak

**Check the Topics/Information Reviewed:**

_X_ safety glasses, hard hat, safety boots
_X_ site safety plan review and location
_X_ equipment and machinery familiarization
__ employee Right-To-Know/MSDS location
_X_ open pits, excavations, and site hazards
_X_ vehicle safety and driving/road conditions
_X_ portable tool safety and awareness
_X_ overhead utility locations and clearance
_X_ first aid, safety, and PPE location
__ sharp object, rebar, and scrap metal hazards
_X_ safety is everyone's responsibility
__ latex gloves inner/nitrile gloves outer
_X_ excavation/trenching inspections/documentation
__ full face respirators with proper cartridges
_X_ upgrade to level c at: PID (___ eV ) >_10_ ppm
_X_ work stoppage at: PID(___ eV) >___ ppm, % LEL > 10%

_X_ slips, trips, and falls
_X_ directions to hospital
__ anticipated visitors
__ electrical ground fault
_X_ public safety and fences
_X_ excavator swing and loading
_X_ orderly site and housekeeping
_X_ smoking in designated areas
_X_ leather gloves for protection
__ effects of the night before
__ vibration related injuries
_X_ fire extinguisher locations
_X_ eye wash station locations
_X_ decontamination procedures

_X_ daily work scope
_x_ emergency protocol
__ parking and laydown
_X_ hot work permits
_X_ strains and sprains
_X_ noise hazards
_X_ no horseplay
_X_ heat and cold stress
_X_ backing up hazards
_X_ accidents are costly
_X_ dust and vapor control
_X_ refueling procedures
__ confined space entry
__ flying debris hazards

**Tasks:** Excavation of contaminated Sludge and direct load into trucks for transportation to disposal facility. Escort of trucks required by Arsenal security and No Smoking, lighters or matches allowed inside gates. Stop for Arsenal trucks when hauling explosives and stay away from magazine buildings on either side of our site by 50 feet.

**Discussion/Comments/Follow-up Actions:** Air monitoring will be conducted during excavation and loading operations

*Note: Use the back of this sheet if necessary for daily task description and discussion*

**SUPERVISION/FOREMAN** _____

Consider the following and check the items which apply to the job, then review with the work crew.

**PERMITS**
- ✓ Required
- ___ Cold Work
- ___ Hot Work
- ✓ Entry Permit (ATK)
- ✓ All Conditions Met
- ✓ Signed Off When Complete
- ___ Other

**PERSONAL PROTECTIVE EQUIP. (PPE)**
- X Type of Gloves
- X Composition of Gloves
- ___ Special Purpose Gloves
- ___ Tyvek Suit
- ___ Acid Suit /Slicker Suit
- ___ Rubber Boots
- ___ Mono Goggles (vented/non-vented)
- ___ Face Shield
- ___ Respirator
- ___ Fresh Air
- ___ Ear Protection
- ___ Safety Harness
- ___ Burning Goggles
- ___ Other

**TOOLS**
- X Current Inspection
- X Proper Tools for the Job
- X Good Tool Condition
- X Qualifications
- ___ Other

**EMERGENCY EQUIPMENT**
- X Fire Extinguishers
- ___ Safety Shower
- X Evacuation Route
- ___ Other

**ACCESS**
- ___ Scaffold (properly inspected)
- ___ Ladder (Tied off)
- ___ Manlift
- ___ Personnel Basket (inspected & approved)
- ___ Operator Training
- ___ Special Provisions
- ___ Other

**WELDING**
- ___ Flashburns
- ___ Combustibles
- ___ Spark Containment
- ___ Shields
- ___ Grounding
- ___ Water Hose
- ___ Fire Extinguisher
- ___ Fire Blanket
- ___ Fire Watch
- ___ Sewer Covers
- ___ Other

**OVERHEAD WORK**
- X Barricades
- ___ Signs
- ___ Hole Cover
- ___ Handrail
- ___ Other

**ELECTRICAL**
- ___ Locked & Tagged out
- ___ Try Start/Stop Switch
- X GFCI Test
- X Assured Grounding
- X Extension Cord Inspection
- ___ Other

**LIFTING**
- ___ Forklift
- ___ Cherry Picker
- ___ Load Chart
- ___ Angle
- ___ Crane
- ___ Chainfall
- X Proper Rigging Practices
- X Manual Lifting
- X Condition of Equipment
- ___ Operator Certificate

**HAZARDS (ENVIRONMENTAL)**
- ___ Electrical Shock
- ___ Heat Stress
- ___ Heavy Objects
- ___ Hot/Cold Surf. Or Mat.
- ___ Inadequate Lighting
- ___ Line Breaking
- ___ Noise
- ___ Poor Access/Egress
- ___ Sharp Objects
- ___ Other

**HAZARDS/CHEMICALS**
- ___ Chemical Burn Shin/Eyes
- ___ Flammable
- ___ Ingestion
- ___ Inhalation
- ___ Skin Contamination

**HAZARDS/BODY**
- ___ Fall Potential
- ___ Pinch Points
- ___ Slip-Trip Potential
- ___ Other

**OTHER WORK IN AREA**
- ___ Others Working Overhead
- ___ Type Work Others Doing
- ___ PPE Due to Other Work
- ✓ Other WATCH FOR EXPLOSIVE TRANSPORT TRUCKS

**Confined Space**

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

JOB#:
PERMIT#: 123461
ISSUED BY:

**Location of Job** RFAAP - SWMU 39 and SWMU 51
(Unit/Location on Project):STA 1 WEST

Required PPE:

LEVEL D

Pre-Job Preparation

1. Fill out JSA
2. Review JSA (EVERYONE)
3. Sign JSA (EVERYONE)

**Safety Access/ Location**

Safe Haven: Gate 10
Wind Direction: N/A
Evacuation Route: Follow Transport Route
Assembly Point: Gate 10

Supervisor of Work: S. Kratak
JSA Prepared By: Same
Are other crews in area No

New: X
Revised:

**Job Task**
(What are You Doing)

Prepare entry ramp into SWMU 39 pond A
BACKFILL AT SWMU 51 (10 15' lifts)
Compact at SWMU 51 w/ bucket (only)

**Site Cleanup**

* Work out details of Excavating windrows at ponds.

**Potential Hazards**

Equipment operations
Excavation Safety
Traffic through Plant (Right of way to Explosive Trucks and escorted Vehicles)
Slip Trip Fall
Cold Stress

**Recommended Action or Procedure**

Follow Standard Shaw SOP's
Follow RFAAP Safety Policies

**Audit the Job**
Audit Time:

## Confined Space

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

SUPERVISOR/FOREMAN RECOMMENDATION: ASK FOR HELP IF YOU NEED IT OR ARE NOT 100% SURE ABOUT YOUR TASK. _____

## Confined Space

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

SUPERVISOR/FOREMAN RECOMMENDATION: ASK FOR HELP IF YOU NEED IT OR ARE NOT 100% SURE ABOUT YOUR TASK. _____

# JOB SAFETY ANALYSIS

**DATE:**
**JOB#:**
**PERMIT#:**
**ISSUED BY:**

**SUPERVISION/FOREMAN** _____ _____

Consider the following and check the items which apply to the job, then review with the work crew.

**PERMITS**
- ___ Required
- ___ Cold Work
- X Hot Work
- X Entry Permit
- ___ All Conditions Met
- ___ Signed Off When Complete
- ___ Other _____

**PERSONAL PROTECTIVE EQUIP. (PPE)**
- X Type of Gloves
- X Composition of Gloves
- ___ Special Purpose Gloves
- ___ Tyvek Suit
- ___ Acid Suit /Slicker Suit
- ___ Rubber Boots
- ___ Mono Goggles (vented/non-vented)
- X Face Shield
- ___ Respirator
- ___ Fresh Air
- X Ear Protection
- ___ Safety Harness
- ___ Burning Goggles
- X Other _____

**TOOLS**
- X Current Inspection
- X Proper Tools for the Job
- X Good Tool Condition
- X Qualifications
- ___ Other _____

**EMERGENCY EQUIPMENT**
- X Fire Extinguishers
- ___ Safety Shower
- X Evacuation Route
- ___ Other _____

**ACCESS**
- ___ Scaffold (properly inspected)
- ___ Ladder (Tied off)
- ___ Manlift
- ___ Personnel Basket (inspected & approved)
- ___ Operator Training
- ___ Special Provisions
- ___ Other

**WELDING**
- ___ Flashburns
- ___ Combustibles
- ___ Spark Containment
- ___ Shields
- ___ Grounding
- ___ Water Hose
- ___ Fire Extinguisher
- ___ Fire Blanket
- ___ Fire Watch
- ___ Sewer Covers
- ___ Other _____

**OVERHEAD WORK**
- X Barricades
- ___ Signs
- ___ Hole Cover
- ___ Handrail
- ___ Other _____

**ELECTRICAL**
- ___ Locked & Tagged out
- ___ Try Start/Stop Switch
- X GFCI Test
- X Assured Grounding
- X Extension Cord Inspection
- ___ Other _____

**LIFTING**
- ___ Forklift
- ___ Cherry Picker
- ___ Load Chart
- ___ Angle
- ___ Crane
- ___ Chainfall
- X Proper Rigging Practices
- X Manual Lifting
- X Condition of Equipment
- ___ Operator Certificate

**HAZARDS (ENVIRONMENTAL)**
- ___ Electrical Shock

# Data Validation

**Shaw Environmental, Inc.**
2113 Emmorton Park Road
Edgewood, Maryland
410-612-6350
FAX: 410-612-6351

Shaw® Shaw Environmental, Inc.

**MEMORANDUM**

**TO:** Jeff Parks, Shaw E&I Radford Army Ammunition Plant (RFAAP) Project Manager

**FROM:** Eric Malarek, Shaw E&I Project Chemist

**SUBJECT:** RFAAP Data Validation – Dioxin Furans
Test America Laboratories, Inc., SDG G9G300243

**DATE:** August 24, 2009

The purpose of this memorandum is to present the data validation report for the samples collected at Main Manufacturing Area at RFAAP for FLFA Removal Action on July 27, 2009 and July 28, 2009. The samples were analyzed for Dioxin Furan compounds using USEPA SW-846 Method 8290 High Resolution Gas Chromatography/High Resolution Mass Spectroscopy (HRGC/HRMS). A total of four soil samples were validated. The sample Ids are:

| Field Sample ID | Lab Sample ID | Field Sample ID | Lab Sample ID |
|---|---|---|---|
| LFSC02/FLFA-FL-9-0-1' | G9G300243-002 | LFSC06/FLFA-SW-10-01' | G9G300243-006 |
| LFSC04/FLFA-FL-18-1-2' | G9G300243-004 | TMSC01 | G9G300243-008 |

No field soil sample duplicate pair was collected due to field error. Only sample duplicate pair TMSC01 (G9G300243-008) was collected. This sample should be used for evaluation of LFSC07/FLFA-FL-7-2-3' (G9G300243-007) for dioxin and furans. Data were reviewed and validated using a combination of project QAPP, *DOD Quality Systems Manual for Environmental Laboratories, Final Version 3, January, 2006* (DoD, 2006) (DoD QSM), method-specific criteria, and laboratory SOP criteria. The data qualifier scheme was consistent with the *USEPA Region III Dioxin/Furan Data Validation Guidance* (March, 1999). Parameters evaluated are presented in **Table 1**. Data associated with parameters in compliance with quality control specifications have not been qualified. Data associated with parameters that did not comply with quality control specifications and directly impacted project data have been qualified in accordance with USEPA Region III specifications.

**Table 1 Laboratory Performance Criteria**

| Qualified | | Parameter |
|---|---|---|
| Yes | No | |
| | X | Holding Times and Preservation |
| X | | Blank Analysis |
| | X | Instrument Performance Check |
| | X | Initial Calibration |
| | X | Continuing Calibration |
| | X | Internal Standards (IS) Recovery Standard Solutions |
| | X | Cleanup Standards |
| | X | Laboratory Control Standard or Ongoing Precision Result (OPR) |
| | X | Matrix Spike and Spike Duplicate |
| | X | Field Duplicate |
| X | | Quantitation Verification |

The quality of data collected in support of this sampling activity is considered acceptable with noted qualifications.

Eric Malarek, Chemist

Date

**RFAAP VALIDATION REPORT**
**DIOXIN FURAN REVIEW**
**SDG G9G300243**

**I-Holding Times and Preservation**
The objective is to ascertain the validity of results based on the holding time of the sample from time of collection to time of sample extraction and analysis. Holding time criteria: For solid samples, dioxin and furans are shipped cooled (@4°C ± 2°C) with a maximum holding time of 30 days from sample collection to preparative extraction and 45 days from preparative extraction to determinative analysis.

- Temperature Review: The temperature blank was sent with each cooler and recorded by the laboratory upon receipt. For samples collected on 07/27/09 and 07/28/09, the cooler was received by the primary laboratory (Test America) on 07/30/09 at 4.0°C. All criteria were met. No qualifiers were applied.

- Holding Time Review: For the soil samples collected 07/27/09 and 07/28/09, the dioxins and furans were extracted on 07/30/09 and analyzed on 07/31/09 and 08/01/09. Sample collection dates may be found on the attached form 1s. All criteria were met. No qualifiers were applied.

**II-Blank Analysis**
The purpose of laboratory (or field) blank analyses is to determine the existence and magnitude of contamination problems resulting from field and laboratory activities. No contamination should be found in any of the blanks >EDL (estimated detection limit). The DoD QSM criteria specifies all concentrations should be less than ½ MRL (<MRL for common laboratory contaminants OCDD and OCDF) and <2*EDL for the calibration blanks. Positive sample results are reported and qualified "B", if the concentration of the compound in the sample is ≤10 times (10x) the maximum amount in any blank for the common laboratory contaminants OCDD or OCDF, or 5 times (5X) the maximum amount for other target compounds. **Table 2** summarizes the blank contamination analysis. Action levels are based upon dilution factor of one and for solid matrices were converted to soil values (soil conversion factor = 100) if needed. The rinse blank 072909R (G9G300253-001) applies to the soil samples in this SDG.

## Table 2 Blank Contamination Analysis Summary

J = Estimated value >EDL and <MRL.
Q = Estimated maximum possible concentration (EMPC).
B = Method blank contamination. The associated method blank contains the target analyte at a reportable level.

### III-Instrument Performance Check

Instrument must be tuned with perfluorokerosene (PFK) to achieve a static resolving power of at least 10,000 (10% valley) and lock-mass ion between lowest and highest masses for each descriptor and level of reference compound ≤10%. Documentation of the mass spectrometer resolving power is accomplished by recording the peak profile of the high-mass reference signal (typically m/z 330.9792) obtained during a peak examination by using the low-mass PFK ion at m/z 292.9825 or lower in mass as reference. At the beginning of the each 12-hour period, the chromatographic resolution is verified in the same fashion as in the initial calibration through the analysis of HRCC solution on the DB-5 (or equivalent) column or through the analysis of the column performance solution on the SP-2331 or SP-225 (or equivalent) column. A 25% valley must be achieved between the close eluters.

- All PFK forms were verified and found to be in compliance with method specification. No qualifiers were applied.

**IV-Initial Calibration**
Once the window defining mix has been analyzed and the descriptor switching times have been verified, the five point calibration solutions can be analyzed prior to sample analysis. Per method and DoD QSM, the initial calibration criteria are as follows:

- The percent relative standard deviations for the mean response factors RRF(n) from the 17 unlabeled standards must not exceed ±20%, and those for the labeled reference compounds must not exceed ±30%;
- The signal to noise ratio ≥10% for all target ions;
- Ion abundance ratios must be within the specified control limits in Table 8 (SW846 Method 8290).

- For initial calibration performed on 07/31/09 for all target compounds on instrument 4D5, all criteria were met. No qualifiers were applied. Samples LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC06/FLFA-SW-10-01' (G9G300243-006), and TMSC01 (G9G300243-008) apply to this initial calibration.

- For initial calibration performed on 07/23/09 for all target compounds on instrument 4D5, all criteria were met. No qualifiers were applied. Confirmations for samples LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC06/FLFA-SW-10-01' (G9G300243-006), and TMSC01 (G9G300243-008) apply to this initial calibration.

- For 2,3,7,8-TCDF initial calibration performed on 07/07/09 for all target compounds on instrument 4D5, all criteria were met. No qualifiers were applied. Confirmations for 2,3,7,8-TCDF for samples LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC06/FLFA-SW-10-01' (G9G300243-006), and TMSC01 (G9G300243-008) apply to this initial calibration.

**V-Continuing Calibration**
The continuing calibration consists of two parts: evaluation of the mass resolution and retention time check. Per method and DoD QSM, the following stipulates the continuing calibration criteria.

- The signal signal-to-noise ratio (S/N) must be at least 10:1 for each selected ion current profile (SICP) and for each GC signal representing the elution of a target analyte or labeled standard for each analyte.
- The relative response factor of each analyte for the unlabeled standard must be within ±20% of the average RF obtained from the initial calibration, and the RRF of each labeled standard must be within ±30% of the average RRF established during initial calibration. This is expressed in term of percent difference %D.
- Ion abundance ratios must be within the specified control limits in Table 8 (SW846 Method 8290).

- For continuing calibration performed on 07/31/09 @18:51 on instrument 4D5, all criteria were met. No qualifiers were applied. Samples LFSC02/FLFA-FL-9-0-1' (G9G300243-002) and LFSC04/FLFA-FL-18-1-2' (G9G300243-004) apply to this continuing calibration.

- For continuing calibration performed on 08/01/09 @02:12 on instrument 4D5, all criteria were met. No qualifiers were applied. Samples LFSC06/FLFA-SW-10-01' (G9G300243-006) and TMSC01 (G9G300243-008) apply to this continuing calibration.

**VI-Internal Standards (IS) Recovery Standard Solutions**
Internal standards performance criteria ensure that GC/MS sensitivity and response are stable during every analytical run. Specific criteria include: Recoveries of the isotopically-labeled recovery standards to fall within the 40 to 135 percent range for the tetra- through octachlorinated congeners, or as stated in the data package (DoD QSM limits 40-135%).

- All criteria were met. No qualifiers were applied.

**VII-Cleanup Standards**
Cleanup standards are added to every sample, blank, quality control sample, and calibration solution. This compound is added to the samples after extraction but prior to cleanup and is used to verify the percent recovery obtained using the isotope dilution technique. The control limits are 40 to 135 percent (DoD QSM limits 40-135%).

- All criteria were met. No qualifiers were applied.

**VIII-Laboratory Control Standard (LCS) or Ongoing Precision Result (OPR)**
LCSs are used to monitor laboratory accuracy and precision by calculating the percent recoveries of the spiked compounds. Per DOD QSM and method criteria, acceptable performance is determined by:

1. Recoveries of the isotopically-labeled extraction standards to fall within 40-135% control limits for the tetra- through octachlorinated congeners, or as stated in the data package;

2. Recoveries (accuracy) of the unlabeled compounds should be within $\pm$35% when spiked at the method quantitation limit and within $\pm$30% when spiked above 20 times the method quantitation limit, or as stated in the data package;

3. When duplicate OPR are required, the relative percent difference (RPD) of the unlabeled analytes concentrations should be within 30% when spiked at the method quantitation limit and within $\pm$20% when spiked above 20 times the method quantitation limit.

- Sample G9G300000-459 was used as LCS on 07/31/09 analytical run. All criteria were met. No qualifiers were applied. Samples LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC06/FLFA-SW-10-01' (G9G300243-006), and TMSC01 (G9G300243-008) apply to this LCS.

**IX-Matrix Spike/Matrix Spike Duplicate**
Data for matrix spike/matrix spike duplicates (MS/MSD) are generated to determine long-term precision and accuracy of the analytical method on various matrices and to demonstrate acceptable compound recovery by the laboratory at the time of sample analysis. The percent recoveries (%Rs) and the relative percent difference (RPD) must be within the specified control limits. Per DoD QSM, MS/MSD recoveries must be within in-house laboratory limits (75-125%) and RPD $\leq$20%.

- No project specific soil matrix MS/MSD was performed in this SDG; therefore, it was not evaluated.

**X-Field Duplicate Sample Analysis**
Field duplicates were collected to identify the cumulative precision of the sampling and analytical process and sent to the laboratory blind. The RPD was calculated only for those analytes which were detected in both samples of the duplicate pair. Analytes that were rejected (R-qualified) in either sample of the duplicate pair were excluded from the duplicate assessment. Precision control criterion was established at 50% RPD for the solid matrix samples. Analytical results were qualified as estimated (J) for any RPDs exceeding criteria.

- No field soil sample duplicate pair was collected due to field error. Only sample duplicate pair TMSC01 (G9G300243-008) was collected. This sample should be used for evaluation of LFSC07/FLFA-FL-7-2-3' (G9G300243-007) for dioxin and furans.

**XI-Quantitation Verification**
The accuracy of analytical results is verified through the calculation of several parameters. The percent difference (%D) between the calculated and the reported values should be within 10%. Any sample value >MDL and <MRL or <3*MDL (whichever is greater) was qualified as estimated, "J." The following calculations were performed for verification. Any value reported by the laboratory as estimated based on an analyte to internal standard ratio below the calibration curve was qualified as estimated "J". The signal signal-to-noise ratio (S/N) must be greater than 2.5 for each selected ion current profile (SICP) and for each GC signal representing the elution of a target analyte or labeled standard. Any detected value with ether interference was qualified as estimated "J". For where the ion ratio failed the 25% criteria (Q-lab flag), the estimated maximum possible concentration (EMPC) was reported and flagged estimated "J". For where presence of quantitation interference, the date was flagged estimated "J" for detects and "UJ" for non-detects.

**Sample: LFSC02/FLFA-FL-9-0-1' (G9G300243-002), OCDD**

A(x) = sum of the integrated ion abundances of the quantitation ions for the unlabeled ions;

A(is) = sum of the integrated ion abundances of the quantitation ions for the labeled ions;

Q(is) = quantity, in pg, of the internal standard added to the sample before extraction; Here need to multiply concentration (pg/uL) by final extract volume (uL).

W = weight, in g, of the sample (solid or organic liquid) as dry weight, or volume in mL of an aqueous sample; and

Avg. RRF(n) = calculated mean relative response factor for the unlabeled analyte.

$$\text{Conc. (ng/kg)} = \frac{(A(x))*Q(is)}{A(is) * W * \text{Avg. RRF}} = \frac{(1252045000)*4.0*1000}{(193524000) * (10.12 * 0.7800) * 1.061} =$$

= 3100 ng/kg = 3100 pg/g

Reported Value = 3100 pg/g
% Difference = 0.0%
Values were within 10% difference.

## Laboratory and Data Validation Qualifiers

| Qualifier | Definition |
|---|---|
| **Laboratory Qualifiers[1]** | |
| No Code | Confirmed identification. |
| U | Undetected at the limit of detection: The associated data value is the limit of detection, adjusted by any dilution factor used in the analysis. |
| J | Estimated: The analyte was positively identified; the quantitation is estimation. |
| B | Blank contamination: The analyte was detected above one-half the reporting limit in an associated blank. |
| E | Identifies compounds whose concentrations exceed the upper level of the calibration range (organics) or Reported value is estimated because of the presence of interferences. |
| D | Indicates sample was analyzed at a dilution. |
| EMPC | The ion-abundance ratio between the two characteristic PCDD/PCDF ions was outside accepted ranges. The detected PCDD/PCDF was reported as an estimated maximum possible concentration (EMPC). |
| P | Target analyte confirmation >40% RPD for detected compound between the primary and secondary columns. |
| N | Non-target analyte: The analyte is a tentatively identified compound (using mass spectroscopy). |
| Q | One or more quality control criteria failed. |
| **USEPA Region III Data Validation Qualifiers[2]** | |
| R | Unreliable result. Analyte may or may not be present in the sample. Supporting data necessary to confirm result. |
| B | Not detected substantially above the level of the reported in laboratory or field blanks. |
| J | Analyte present. Reported value may not be accurate or precise. |
| UJ | Not detected, quantitaion limit may be inaccurate or imprecise. |
| N | Tenative Identification. Consider present. Special methods may be to confirm its presence or absence in future sampling efforts. |
| NJ | Qualitative identificaition questionable due to poor resolution. Presumptively present at approximate quantity. |
| K | Analyte present. Reported value may be biased high. Actual value is expected to be lower. |
| L | Analyte present. Reported value may be biased low. Actual value is expected to be higher. |
| UL | Not detected, quantitaion limit is probably higher. |

[1]The noted laboratory qualifiers are a minimum. If a laboratory has more and they are consistent with USEPA conventions and properly defined, the laboratory may use them. Data qualifiers may be combined when appropriate.
[2]The USEPA data validation qualifiers are referenced from USEPA Region III Dioxin/Furan Data Validation Guidance (March, 1999) and Region III Modifications to the National Functional Guidelines for Organic Data Review (September 1994).

**MEMORANDUM**

**TO:** Jeff Parks, Shaw E&I Radford Army Ammunition Plant (RFAAP) Project Manager

**FROM:** Eric Malarek, Shaw E&I Project Chemist

**SUBJECT:** RFAAP Data Validation – TAL Metals
Test America Laboratories, Inc., SDG G9G300243

**DATE:** August 24, 2009

The purpose of this memorandum is to present the data validation report for the samples collected at Main Manufacturing Area at RFAAP for FLFA Removal Action on July 27, 2009 and July 28, 2009. Solid samples were analyzed for target analyte list (TAL) metals using USEPA SW-846 3050B/6010B for ICP metals and SW-846 7471A for mercury. A total of eight solid samples were validated. The sample Ids are:

| Field Sample ID | Lab Sample ID | Field Sample ID | Lab Sample ID |
|---|---|---|---|
| LFSC01/FLFA-FL-1-0-1' | G9G300243-001 | LFSC05/FLFA-SW-2-01' | G9G300243-005 |
| LFSC02/FLFA-FL-9-0-1' | G9G300243-002 | LFSC06/FLFA-SW-10-01' | G9G300243-006 |
| LFSC03/FLFA-FL-17-0-1' | G9G300243-003 | LFSC07/FLFA-FL-7-2-3' | G9G300243-007 |
| LFSC04/FLFA-FL-18-1-2' | G9G300243-004 | TMSC01 | G9G300243-008 |

Data were reviewed by Eric Malarek and validated using a combination of project QAPP, *Quality Systems Manual for Environmental Laboratories, Final Version 3, January, 2006* (DoD, 2006) (DoD QSM), method-specific criteria, and laboratory SOP criteria. The data qualifier scheme was consistent with the *Region III Modifications to the National Functional Guidelines for Inorganic Data Review* (April, 1993). Parameters evaluated are presented in **Table 1**. Data associated with parameters in compliance with quality control specifications have not been qualified. Data associated with parameters that did not comply with quality control specifications and directly impacted project data have been qualified in accordance with USEPA Region III specifications.

**Table 1 Laboratory Performance Criteria**

| Qualified | | Parameter |
|---|---|---|
| Yes | No | |
| | X | Holding Times and Preservation |
| | X | Initial and Continuing Calibration |
| | X | Blank Analysis |
| | X | ICP Interference Check Sample (ICS) |
| | X | Laboratory Control Sample (LCS) |
| | X | Laboratory Sample Duplicate |
| X | | Matrix Spike and Spike Duplicate |
| | X | ICP Serial Dilution |
| X | | Field Sample Duplicate |
| X | | Quantitation Verification |

The quality of data collected in support of this sampling activity is considered acceptable with noted qualifications.

Eric Malarek, Chemist

8/24/09
Date

**RFAAP VALIDATION REPORT**
**METALS REVIEW**
**SDG G9G300243**

## I-Holding Times and Preservation

The primary objective is to ascertain the validity of results based on the holding time of the sample from time of collection to time of sample analysis. Holding time criteria: For solid matrices, the samples are shipped cool @4°C±2°C with a maximum holding time is 180 days for ICP metals and 28 days for mercury.

- Temperature Review: The temperature blank was sent with each cooler and recorded by the laboratory upon receipt. For samples collected on 07/27/09 and 07/28/09, the cooler was received by the primary laboratory (Test America) on 07/30/09 at 4.0°C. All criteria were met. No qualifiers were applied.

- Holding Time Review: Samples were collected 07/27/09 and 07/28/09 for metals analysis. For solid samples, the soil samples were digested on 07/31/09 and analyzed on 07/31/09 for ICP metals. Mercury was digested on 07/30/09 and analyzed on 07/31/09. Sample collection dates may be found on the attached form 1s. All criteria were met. No qualifiers were applied.

## II-Initial and Continuing Calibration

Requirements for satisfactory instrument calibration are established to ensure that the instrument is capable of producing acceptable quantitative data. Initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of the analysis run, and continuing calibration verification documents that the initial calibration is still valid.

| | | | |
|---|---|---|---|
| ICP: | 1- blank (DoD QSM <½ MRL) | Hg: | 1 – blank (DoD QSM <½ MRL) |
| | 3 – standards (r≥0.995) | | 5 – standards (r≥0.995) |
| | ICV/CCV (90-110%) (DoD QSM 90-110%) | | ICV/CCV (80-120%)(DoD QSM ICV 90-110% & CCV 80-120%) |
| | MRL (70-130%) (DoD QSM 80-120%) | | MRL (80-120%) (DoD QSM 80-120%) |
| | High Std. (95-105%) | | High Std. (95-105%) |

- The solid samples were analyzed for ICP metals on 07/31/09. Mercury was analyzed for the solid samples on 07/31/09 with a correlation coefficient of 0.9999. All ICV/CCV/High Standard/MRL criteria were met for all metals and runs. No qualifiers were applied.

## III-Blanks

Blanks (preparation and calibration blanks) are assessed to determine the existence and magnitude of contamination problems. No contaminants should be detected (i.e. <MDL) in any of the associated blanks. DoD QSM limits are <½MRL for the method blank and <2*MDL for the calibration blanks. Samples are qualified "B" when they are less than 5x the absolute value of the maximum blank concentration. **Table 2** summarizes the blank contamination analysis. Action levels are based upon dilution factor of one and for solid matrices were converted to soil values (soil conversion factor = 10 for ICP and Hg = 12) if needed. The rinse blank 072909R (G9G300253-001) applies to the soil samples in this SDG.

**Table 2 Blank Contamination Analysis Summary**

| Analysis Date | Analysis | QC Blank ID | Max Conc. mg/kg | Action Level mg/kg | B qualified samples |
|---|---|---|---|---|---|
| 07/31/09 | ICP Metals | ICB/CCBs | <2*MDL | NA | None |
| 07/31/09 | Mercury | ICB/CCBs | <2*MDL | NA | None |
| 07/31/09 | ICP Metals | G9G300000-345 | <1/2*MRL | NA | None |
| 07/31/09 | Mercury | G9G300000-453 | <1/2*MRL | NA | None |
| 07/31/09 | ICP Metals | 072909R | <1/2*MRL | NA | None |
| 08/04/09 | Mercury | 072909R | <1/2*MRL | NA | None |

NA = Not Applicable
MDL = Method Detection Limit.
MRL = Method Reporting Limit.

**IV-ICP Interference Check Sample (ICS)**
The ICP interference check sample (ICS) verifies interelement and background correction factors. ICP Interference Check is performed at the beginning and end of each sample analysis run. Control limits are 80-120% (DoD QSM limits 80-120%).

- All criteria were met. No qualifiers were applied.

**V-Laboratory Control Samples (LCS)**
The laboratory control sample (LCS) serves as a monitor of the overall performance of each step during the analysis, including the sample preparation. All aqueous LCS results must fall within the control limits. The DoD QSM solid LCS recovery limits are specified in Table D-19 of the DoD QSM (DoD, 2006). If the compound is not listed, then the laboratory criteria shall be used.

- Sample G9G300000-345 was used as solid LCS for ICP metals analysis on 07/31/09. All criteria were met. No qualifiers were applied. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this LCS.

- Sample G9G300000-453 was used as solid LCS for mercury analysis on 07/31/09. All criteria were met. No qualifiers were applied. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this LCS.

**VI-Laboratory Duplicate Sample Analysis**
Duplicate sample determinations are used to demonstrate acceptable method precision by the laboratory at the time of analysis. Duplicate analyses are also performed to generate data in order to determine the long-term precision of the analytical method on various matrices. RPDs must be within established control limits. DoD QSM limits for metals are 20% RPD for ICP metals and mercury.

- No laboratory duplicate was analyzed. Laboratory precision was evaluated using the Matrix Spike and Matrix Spike Duplicate (Section VII).

**VII-Matrix Spike/Spike Duplicate**
MS/MSD are generated to determine long-term precision and accuracy of the analytical method on various matrices and to demonstrate acceptable compound recovery by the laboratory at the time of sample analysis. Specific criteria include the analyses of matrix spike and matrix spike duplicate samples at a frequency of one MS and MSD per 20 samples of similar matrix. MS and MSD recoveries and relative percent differences between MS and MSD recoveries should be within the specified limits. DoD QSM solid MS/MSD recovery limits follow the LCS criteria and are specified in Table D-19 of the DoD QSM (DoD, 2006). If the compound is not listed, then the laboratory criteria shall be used. Post digestion spikes limits are 75-125% for ICP metals and mercury.

- Sample LFSC01/FLFA-FL-1-0-1' (G9G300243-001) was used as solid laboratory MS/MSD for ICP metals analysis on 07/31/09. Aluminum (1380%, 1170%), antimony (39%, 42%), iron (290%, 125%), and manganese (0.0%, 0.0%) were outside criteria. All other recoveries and RPD values were within criteria. The associated LCS (Section V) was within criteria. The sample concentration was >4 times the spike added for aluminum, iron, and manganese; therefore, no qualifiers were applied based upon these outliers. Antimony was qualified bias low "L" for detects and "UL" for non-detects based upon the low recoveries. All other metals were within criteria. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this MS/MSD.

- Sample LFSC05/FLFA-SW-2-01' (G9G300243-005) was used as solid MS/MSD for mercury analysis on 07/31/09. All criteria were met. No qualifiers were applied. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this MS/MSD.

**VIII-ICP Serial Dilution**

An ICP serial dilution is performed to determine whether significant physical or chemical interferences exist due to sample matrix at high concentrations. An analysis of a 5-fold dilution should agree within 10% difference of the original result when the concentration in sample is a factor of 50 above MDL.

- The serial dilution for ICP metals was analyzed on 07/31/09 using solid sample LFSC01/FLFA-FL-1-0-1' (G9G300243-001). All criteria were met. No qualifiers were applied. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this serial dilution.

- The serial dilution for mercury was analyzed on 07/31/09 using solid sample LFSC05/FLFA-SW-2-01' (G9G300243-005). Mercury (13.6%) was outside of criteria limits. Sample concentrations were <50 times MDL for mercury; therefore, no qualifiers were applied based upon this outlier. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this serial dilution.

**IX-Field Duplicate Sample Analysis**

Field duplicates were collected to identify the cumulative precision of the sampling and analytical process and sent to the laboratory blind. The RPD was calculated only for those analytes which were detected at levels exceeding the method reporting limits in both samples of the duplicate pair. Analytes that were rejected (R-qualified) in either sample of the duplicate pair were excluded from the duplicate assessment. Precision control criterion was established at 35% RPD for the solid samples. Analytical results were qualified as estimated (J) for any RPDs exceeding criteria.

- Field soil sample duplicate pair LFSC07/FLFA-FL-7-2-3' (G9G300243-007) and TMSC01 (G9G300243-008) was collected for TAL metals. All detected TAL metals found in the sample and its duplicate pair and associated %RPD are noted in **Table 4**. All other TAL metals target compounds were non-detect. Arsenic (41.4%), iron (38.3%), magnesium (36.4%), manganese (43.9%), potassium (71.7%), and cobalt (36.0%) were above criteria due to low concentration levels detected below the MRL. Arsenic, iron, magnesium, manganese, potassium, and cobalt were qualified estimated "J" for the original and duplicate pair samples based upon these outliers. For all other metals, all criteria were met.

**Table 4 Field Precision Hits Analysis Summary for TAL Metals for Duplicate Pair LFSC07/FLFA-FL-7-2-3' (G9G300243-007) and TMSC01 (G9G300243-008)**

| Compound | Original Sample (mg/kg) | Duplicate Pair (mg/kg) | %RPD |
|---|---|---|---|
| Mercury | 0.014B | 0.014B | 0.0 |
| Arsenic | 6.7 | 4.4 | 41.4 |
| Iron | 33600 | 22800 | 38.3 |
| Lead | 16.7 | 12.3 | 30.3 |
| Magnesium | 6990 | 10100 | 36.4 |
| Manganese | 798 | 511 | 43.9 |
| Barium | 52.6 | 48.6 | 7.9 |
| Nickel | 14.8 | 15.1 | 2.0 |
| Potassium | 1030 | 2180 | 71.7 |
| Beryllium | 0.93 | 0.86 | 7.8 |
| Sodium | 32.1B | 33.9B | 5.5 |
| Vanadium | 57.3 | 44.3 | 25.6 |
| Zinc | 32.3 | 32.2 | 0.3 |
| Chromium | 41.5 | 40.7 | 2.0 |
| Calcium | 1110 | 1090 | 1.8 |
| Cobalt | 15.4 | 10.7 | 36.0 |
| Copper | 12.8 | 14.0 | 9.0 |
| Aluminum | 16900 | 17300 | 2.3 |

B = Estimated value <MRL and >MDL. Data point qualified was estimated "J".

**X-Quantitation Verification**

The accuracy of analytical results is verified through the calculation of several parameters. The percent difference (%D) between the calculated and the reported values should be within 10%. Any sample value >MDL and <MRL or <3*MDL (whichever is greater) was qualified as estimated, "J." The following calculations were performed for verification.

**Sample: LFSC01/FLFA-FL-1-0-1' (G9G300243-001), Barium**

Conc. (mg/kg) = {(conc. µg/L)*(Final Volume L)*(DF)} / {(Weight Sample g)*(Fraction Solids)}

Conc. (mg/kg) = {(556.55 µg/L)*(0.100 L)*(1)} / {(1.03 g)*(0.8296)} = 65.1 µg/g = 65.1 mg/kg

Reported concentration = 65.1 mg/kg
%D = 0.0%
Values were within 10% difference.

**Sample: LFSC01/FLFA-FL-1-0-1' (G9G300243-001), Mercury**

Conc. (mg/kg) = {(conc. µg/L)*(Final Volume L)*(DF)} / {(Weight Sample g)*(Fraction Solids)}

Conc. (mg/kg) = {(0.345 µg/L)*(0.050 L)*(1)} / {(0.60 g)*(0.8296)} = 0.035 µg/g = 0.035 mg/kg

Reported concentration = 0.035 mg/kg
%D = 0.0%
Values were within 10% difference.

## Laboratory and Data Validation Qualifiers

| Qualifier | Definition |
|---|---|
| **Laboratory Qualifiers[1]** | |
| No Code | Confirmed identification. |
| U | Undetected at the limit of detection: The associated data value is the limit of detection, adjusted by any dilution factor used in the analysis. |
| J | Estimated: The analyte was positively identified; the quantitation is estimation. |
| B | Blank contamination: The analyte was detected above one-half the reporting limit in an associated blank. |
| E | Identifies compounds whose concentrations exceed the upper level of the calibration range (organics) or Reported value is estimated because of the presence of interferences. |
| D | Indicates sample was analyzed at a dilution. |
| EMPC | The ion-abundance ratio between the two characteristic PCDD/PCDF ions was outside accepted ranges. The detected PCDD/PCDF was reported as an estimated maximum possible concentration (EMPC). |
| P | Target analyte confirmation >40% difference for detected compound between the primary and secondary columns. |
| N | Non-target analyte: The analyte is a tentatively identified compound (using mass spectroscopy). |
| Q | One or more quality control criteria failed. |
| **USEPA Region III Data Validation Qualifiers[2]** | |
| R | Unreliable result. Analyte may or may not be present in the sample. Supporting data necessary to confirm result. |
| B | Not detected substantially above the level of the reported in laboratory or field blanks. |
| J | Analyte present. Reported value may not be accurate or precise. |
| UJ | Not detected, quantitation limit may be inaccurate or imprecise. |
| N | Tentative Identification. Consider present. Special methods may be to confirm its presence or absence in future sampling efforts. |
| NJ | Qualitative identification questionable due to poor resolution. Presumptively present at approximate quantity. |
| K | Analyte present. Reported value may be biased high. Actual value is expected to be lower. |
| L | Analyte present. Reported value may be biased low. Actual value is expected to be higher. |
| UL | Not detected, quantitation limit is probably higher. |

[1]The noted laboratory qualifiers are a minimum. If a laboratory has more and they are consistent with USEPA conventions and properly defined, the laboratory may use them. Data qualifiers may be combined when appropriate.
[2]The USEPA data validation qualifiers are referenced from *Region III Modifications to the National Functional Guidelines for Inorganic Data Review* (April, 1993).

Test America Laboratories, Inc., SDG G9G300243

**DATE:** August 20, 2009

The purpose of this memorandum is to present the data validation report for the samples collected at Main Manufacturing Area at RFAAP for FLFA Removal Action on July 27, 2009 and July 28, 2009. Solid samples were analyzed for PCBs using USEPA Method 3550B/3665A/8082. A total of eight solid samples were validated. The sample Ids are:

| Field Sample ID | Lab Sample ID | Field Sample ID | Lab Sample ID |
|---|---|---|---|
| LFSC01/FLFA-FL-1-0-1' | G9G300243-001 | LFSC05/FLFA-SW-2-01' | G9G300243-005 |
| LFSC02/FLFA-FL-9-0-1' | G9G300243-002 | LFSC06/FLFA-SW-10-01' | G9G300243-006 |
| LFSC03/FLFA-FL-17-0-1' | G9G300243-003 | LFSC07/FLFA-FL-7-2-3' | G9G300243-007 |
| LFSC04/FLFA-FL-18-1-2' | G9G300243-004 | TMSC01 | G9G300243-008 |

Data were reviewed by Eric Malarek and validated using a combination of project QAPP, *Quality Systems Manual for Environmental Laboratories, Final Version 3, January, 2006* (DoD, 2006) (DoD QSM), method-specific criteria, and laboratory SOP criteria. The data qualifier scheme was consistent with the *Region III Modifications to the National Functional Guidelines for Organic Data Review* (September 1994). Parameters evaluated are presented in **Table 1**. Data associated with parameters in compliance with quality control specifications have not been qualified. Data associated with parameters that did not comply with quality control specifications and directly impacted project data have been qualified in accordance with USEPA Region III specifications.

**Table 1 Laboratory Performance Criteria**

| Qualified | | Parameter |
|---|---|---|
| Yes | No | |
| | X | Holding Times and Preservation |
| | X | Initial Calibration |
| | X | Continuing Calibration |
| | X | Blank Analysis |
| | X | System Monitoring Compounds |
| | X | Laboratory Control Samples |
| X | | Matrix Spike/Spike Duplicate |
| | X | Field Duplicate |
| X | | Quantitation Verification |

The quality of data collected in support of this sampling activity is considered acceptable with noted qualifications.

Eric Malarek, Chemist

8/20/09
Date

**RFAAP VALIDATION REPORT**
**PCB REVIEW**
**SDG G9G300243**

**I-Holding Times and Preservation**
The objective is to ascertain the validity of results based on the holding time of the sample from time of collection to time of sample extraction and analysis. Holding time criteria: For solid samples, PCB compounds are shipped cooled (@4°C ± 2°C) with a maximum holding time of 14 days from sample collection to preparative extraction and 40 days from preparative extraction to determinative analysis.

- Temperature Review: The temperature blank was sent with each cooler and recorded by the laboratory upon receipt. For samples collected on 07/27/09 and 07/28/09, the cooler was received by the primary laboratory (Test America) on 07/30/09 at 4.0°C. All criteria were met. No qualifiers were applied.

- Holding Time Review: The solid samples were collected on 07/27/09 and 07/28/09. The PCBs were extracted on 07/30/09 and analyzed on 07/31/09. Sample collection dates may be found on the attached form 1s. All criteria were met. No qualifiers were applied.

**II-Initial Calibration**
Compliance requirements for satisfactory instrument calibration are established to ensure that the instrument is capable of producing acceptable qualitative and quantitative data for the target compounds. The initial 5 point calibration demonstrates that the instrument is capable of acceptable performance in the beginning of the analytical run. Calibration factors are generated for each compound. The DoD QSM specifies that the percent relative standard deviation (%RSD) for all single peak target analytes, and aroclors 1016 and 1260 must be <20% or the mean %RSD for all analytes in the standard must be ≤20%. If linear regression is used, the correlation coefficient must be ≥0.995. All detects are qualified as estimated "J" for where there were exceeding %RSDs, and all non-detects are qualified as estimated "UJ" for where there were grossly exceeding recoveries, unless determined to be unusable "R". Grossly exceeding is defined as twice the established criteria limits.

- For the PCB initial calibration performed on 06/06/09 on instrument GC66A.i, all criteria were met. No qualifiers were applied. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) were analyzed using this initial calibration.

- For the PCB initial calibration performed on 08/03/09 on instrument GC66B.i, all criteria were met. No qualifiers were applied. The confirmations for samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC05/FLFA-SW-2-01' (G9G300243-005), and LFSC06/FLFA-SW-10-01' (G9G300243-006) were analyzed using this initial calibration.

**III-Continuing Calibration**
Compliance requirements for satisfactory instrument calibration are established to ensure that the instrument is capable of producing acceptable qualitative and quantitative data for pesticide/PCB target compounds. Continuing calibration standards containing both target compounds and surrogates are analyzed at the beginning of each 12-hour analytical shift and after every 20 samples. The DoD QSM specifies that the percent difference (%D) or the average %Ds for all analytes in the standard from the initial calibration should be no greater than ±20%.

- For PCB 1016/1260 initial calibration verification performed on 06/06/09 @18:32 on instrument GC66A.i, all criteria were met. No qualifiers were applied. No samples reported were analyzed using this initial calibration verification.

- For PCB 1016/1260 continuing calibration performed on 07/31/09 @17:31 on instrument GC66A.i, all criteria were met. No qualifiers were applied. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) were analyzed using this continuing calibration.

- For PCB 1016/1260 continuing calibration performed on 07/31/09 @17:31 on instrument GC66A.i, all criteria were met. No qualifiers were applied. No samples reported were analyzed using this continuing calibration.

- For PCB 1016/1260 initial calibration verification performed on 08/03/09 @20:27 on instrument GC66B.i, all criteria were met. No qualifiers were applied. The confirmations for samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC05/FLFA-SW-2-01' (G9G300243-005), and LFSC06/FLFA-SW-10-01' (G9G300243-006) were analyzed No samples reported were analyzed using this initial calibration verification.

- For PCB 1016/1260 continuing calibration performed on 08/04/09 @00:04 on instrument GC66B.i, all criteria were met. No qualifiers were applied. No samples reported were analyzed using this continuing calibration.

**IV-Blank Analysis**

The purpose of laboratory or field blank analyses is to determine the existence and magnitude of contamination problems resulting from laboratory or field activities. One method blank per analytical batch must be run on each instrument used to analyze samples. The DoD QSM criterion specifies all concentrations should be less than one-half MRL. Positive sample results are reported and qualified "B", if the concentration of the compound in the sample is ≤5 times (5X) the maximum amount for pesticide and PCB target compounds. **Table 2** summarizes the blank contamination analysis. Action levels are based upon dilution factor of one and for solid matrices were converted to soil values (soil conversion factor = 33) if needed. The rinse blank 072909R (G9G300253-001) applies to the soil samples in this SDG.

**Table 2 Blank Contamination Analysis Summary**

| Parameter | Analysis Date | QC Blank ID | Compound | Max Conc. µg/kg | Action Level µg/kg | B qualified samples |
|---|---|---|---|---|---|---|
| PCBs | 07/31/09 | G9G300000-400 | All target <½MRL | NA | NA | None |
| PCBs | 08/04/09 | 072909R | All target <½MRL | NA | NA | None |

NA = Not Applicable
MRL = Method Reporting Limit

**V-System Monitoring Compound (Surrogates)**

Laboratory performance on individual samples is evaluated through the review of surrogate spike samples. Surrogate spikes are added to all samples and blanks to measure their recovery in sample and blank matrices. The percent recoveries (%Rs) must be within the specified control limits. DoD surrogate recovery limits are specified in Table D-3 of the DoD QSM (DoD, 2006). If the surrogate is not listed, then the laboratory criteria shall be used.

Solid Criteria: Decachlorobiphenyl: PCBs: 60-125% (DoD QSM 60-125%)

- All criteria were met. No qualifiers were applied.

**VI-Laboratory Control Samples**
Laboratory control samples (LCS) are used to monitor laboratory accuracy by calculating the percent recoveries of the spiked compounds. All LCS percent recoveries must be within the specified control limits. DoD QSM solid LCS recovery limits are specified in Table D-17 of the DoD QSM (DoD, 2006). If the compound is not listed, then the laboratory criteria shall be used.

- Sample G9G300000-400 was used as the solid LCS for the PCB analysis on 07/31/09. All criteria were met. No qualifiers were applied. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this LCS.

**VII-Matrix Spike/Matrix Spike Duplicate**
Data for matrix spike/matrix spike duplicates (MS/MSD) are generated to determine long-term precision and accuracy of the analytical method on various matrices and to demonstrate acceptable compound recovery by the laboratory at the time of sample analysis. The percent recoveries (%Rs) and the relative percent difference (RPD) must be within the specified control limits. DoD solid MS/MSD recovery limits follow the LCS criteria and are specified in Table D-17 of the DoD QSM (DoD, 2006). If the compound is not listed, then the laboratory criteria shall be used.

- Sample LFSC01/FLFA-FL-1-0-1' (G9G300243-001) was used as the MS/MSD for the PCB analysis on 07/31/09. PCB-1260 (41%; RPD=33%) was outside criteria. For PCB-1016, all criteria were met. The associated LCS (Section VI) was within criteria for all target PCBs. The spiked sample was qualified estimated "J" based upon the high RPD and low recovery. Samples LFSC01/FLFA-FL-1-0-1' (G9G300243-001), LFSC02/FLFA-FL-9-0-1' (G9G300243-002), LFSC03/FLFA-FL-17-0-1' (G9G300243-003), LFSC04/FLFA-FL-18-1-2' (G9G300243-004), LFSC05/FLFA-SW-2-01' (G9G300243-005), LFSC06/FLFA-SW-10-01' (G9G300243-006), LFSC07/FLFA-FL-7-2-3' (G9G300243-007), and TMSC01 (G9G300243-008) apply to this MS/MSD.

**VIII-Field Duplicate Sample Analysis**
Field duplicates were collected to identify the cumulative precision of the sampling and analytical process and sent to the laboratory blind. The RPD was calculated only for those analytes which were detected at levels exceeding the method reporting limits in both samples of the duplicate pair. Analytes that were rejected (R-qualified) in either sample of the duplicate pair were excluded from the duplicate assessment. Precision control criterion was established at 50% RPD for the solid samples. Analytical results were qualified as estimated (J) for any RPDs exceeding criteria.

- Field soil sample duplicate pair LFSC07/FLFA-FL-7-2-3' (G9G300243-007) and TMSC01 (G9G300243-008) was collected for chlorinated PCBs. All chlorinated PCB target compounds were non-detect for the duplicate pair. All criteria were met. No qualifiers were applied.

**IX-Quantitation Verification**
The accuracy of analytical results was verified through the calculation of several parameters. The difference between the calculated value and the reported value must be within 10% difference. All positive values must have less than or equal to 40% %D between the primary and secondary columns. Any sample value >MDL and <MRL or <3*MDL (whichever is greater) was qualified as estimated, "J."

- All positive chlorinated PCBs met confirmation criteria. No qualifiers were applied.

**Sample: LFSC01/FLFA-FL-1-0-1' (G9G300243-001), Aroclor 1260**

Conc. µg/kg = (Ax * Vt * DF) / (CF * Vi * Ws * D)

where: Conc. = Sample concentration in µg/kg
Ax = Area/response for compound being measured.
Vt = Volume of total extract, taking into account dilutions (i.e., a 1-to-10 dilution of a 1-mL extract will mean V(t) = 10000 µL.
CF = Ave calibration response factor for compound being measured from ICAL (Area/pg)
Vi = Volume of extract injected (µL).
W(s) = Weight of sample extracted or diluted in grams.
D = Percent dry weight (100 - % moisture in sample)/100 = 1.0 for Wet Weight
DF = Dilution factor

Conc (Totals) µg/kg = (4970453679Area*10000µL*1) / (22920562Area/pg*(1000)*1µL*29.93g*0.83)
= 87 µg/kg (Signal #1)

Reported Value = 87 µg/kg (signal #1)
% Difference = 0.0%
Values were within 10% difference.

## Laboratory and Data Validation Qualifiers

| Qualifier | Definition |
|---|---|
| **Laboratory Qualifiers[1]** | |
| No Code | Confirmed identification. |
| U | Undetected at the limit of detection: The associated data value is the limit of detection, adjusted by any dilution factor used in the analysis. |
| J | Estimated: The analyte was positively identified; the quantitation is estimation. |
| B | Blank contamination: The analyte was detected above one-half the reporting limit in an associated blank. |
| E | Identifies compounds whose concentrations exceed the upper level of the calibration range (organics) or Reported value is estimated because of the presence of interferences. |
| D | Indicates sample was analyzed at a dilution. |
| EMPC | The ion-abundance ratio between the two characteristic PCDD/PCDF ions was outside accepted ranges. The detected PCDD/PCDF was reported as an estimated maximum possible concentration (EMPC). |
| P | Target analyte confirmation >40% D for detected compound between the primary and secondary columns. |
| N | Non-target analyte: The analyte is a tentatively identified compound (using mass spectroscopy). |
| Q | One or more quality control criteria failed. |
| **USEPA Region III Data Validation Qualifiers[2]** | |
| R | Unreliable result. Analyte may or may not be present in the sample. Supporting data necessary to confirm result. |
| B | Not detected substantially above the level of the reported in laboratory or field blanks. |
| J | Analyte present. Reported value may not be accurate or precise. |
| UJ | Not detected, quantitation limit may be inaccurate or imprecise. |
| N | Tentative Identification. Consider present. Special methods may be to confirm its presence or absence in future sampling efforts. |
| NJ | Qualitative identification questionable due to poor resolution. Presumptively present at approximate quantity. |
| K | Analyte present. Reported value may be biased high. Actual value is expected to be lower. |
| L | Analyte present. Reported value may be biased low. Actual value is expected to be higher. |
| UL | Not detected, quantitation limit is probably higher. |

[1]The noted laboratory qualifiers are a minimum. If a laboratory has more and they are consistent with USEPA conventions and properly defined, the laboratory may use them. Data qualifiers may be combined when appropriate.
[2]The USEPA data validation qualifiers are referenced from *Region III Modifications to the National Functional Guidelines for Organic Data Review* (September 1994).

## A. Waste Generator Facility Information (must reflect location of waste generation/origin)

1. Generator Name: Alliant Tech Systems Inc. (RFAAP) Jeremy.Flint@ATK.com
2. Site Address: Route 114
3. City/ZIP: Radford, 24141
4. State: VA
5. County: Montgomery
6. Contact Name/Title: ~~Beth Crawford~~ Jeremy Flint
7. Email Address: ~~beth.crawford@shawgrp.com~~ 540 639 8109
8. Phone: ~~419-425-6071~~ 5406397668 9. FAX: ~~419-425-608~~
10. NAICS Code: 325920
11. Generator USEPA ID #: VA1210020730
12. State ID# (if applicable): NA

## B. Customer Information ☐ same as above

P. O. Number: _____

1. Customer Name: Shaw E&I
2. Billing Address: PO Box 98519
3. City, State and ZIP: Baton Rouge, LA, 70884
4. Contact Name: Beth Crawford
5. Contact Email: beth.crawford@shawgrp.com
6. Phone: 419-425-6071 FAX: 419-425-6085
7. Transporter Name: Thompson Trucking
8. Transporter ID # (if appl.): _____
9. Transporter Address: State Highway 460 East PO Box 969
10. City, State and ZIP: Concord, VA, 24538

## C. Waste Stream Information

1. DESCRIPTION

a. Common Waste Name: Non-Hazardous Lead Contaminated Soils
State Waste Code(s): NA

b. Describe Process Generating Waste or Source of Contamination: Army Ammunition Plant
Final remediation of the Former Lead Furnace Area at Radford ~~Arsenal~~. The grossly contaminated soils were removed several years ago. Final removal is current to meet clean-up standards
+RCRA Empty Drums RB 7-27-09

c. Typical Color(s): Brown

d. Strong Odor? ☐ Yes ☑ No Describe: _____

e. Physical State at 70°F: ☑ Solid ☐ Liquid ☐ Powder ☐ Semi-Solid or Sludge ☐ Other: _____

f. Layers? ☐ Single layer ☐ Multi- layer ☑ NA

g. Water Reactive? ☐ Yes ☑ No If Yes, Describe: _____

h. Free Liquid Range (%): _____ to _____ ☑ NA(solid)

i. pH Range: ☐ ≤2 ☐ 2.1-12.4 ☐ ≥12.5 ☑ NA(solid) ☐ Actual: 7.5 (SW 846 - 9045C)

j. Liquid Flash Point: ☐ < 140°F ☐ ≥ 140°F ☑ NA(solid) ☐ Actual: _____

k. Flammable Solid: ☐ Yes ☑ No

l. Physical Constituents: List all constituents of waste stream - (e.g. Soil 0-80%, Wood 0-20%): ☐ (See Attached)

| Constituents (Total Composition Must be = 100%) | Lower Range | Unit of Measure | Upper Range | Unit of Measure |
|---|---|---|---|---|
| 1. Soils | 90 | % | 100 | % |
| 2. PPE and Expendables | 0 | % | 10 | % |
| 3. Barium (TCLP) | 2.2 | ~~PPM~~ mg/L | | |
| 4. Cadmium (TCLP) | 0.009 | PPM mg/L | | |
| 5. Lead (TCLP) | 0.69 | PPM mg/L | | |
| 6. | | | | |

2. ESTIMATED QUANTITY OF WASTE AND SHIPPING INFORMATION

a. ☑ One Time Event ☐ Base ☐ Repeat Event

b. Estimated Annual Quantity: 800-1000 ☑ Tons ☐ Cubic Yards ☐ Drums ☐ Gallons ☐ Other (specify): _____

c. Shipping Frequency: 10-15 trucks daily Units per ☐ Month ☐ Quarter ☐ Year ☑ One Time ☐ Other

d. Is this a U.S. Department of Transportation (USDOT) Hazardous Material? (If yes, answer e.) ☐ Yes ☑ No

e. USDOT Shipping Description (if applicable): NA

3. SAFETY REQUIREMENTS (Handling, PPE, etc.): None

# Generator's Nonhazardous Waste Profile Sheet

100739

## D. Regulatory Status (Please check appropriate responses)

1. Is this a USEPA (40 CFR Part 261)/State hazardous waste? If yes, contact your sales representative. ☐ Yes ☑ No
2. Is this waste included in one or more of categories below (Check all that apply)? If yes, attach supporting documentation. ☐ Yes ☑ No
   - ☐ Delisted Hazardous Waste
   - ☐ Excluded Wastes Under 40 CFR 261.4
   - ☐ Treated Hazardous Waste Debris
   - ☐ Treated Characteristic Hazardous Waste
3. Is the waste from a Federal (40 CFR 300, Appendix B) or state mandated clean-up? If yes, see instructions. ☐ Yes ☑ No
4. Does the waste represented by this waste profile sheet contain radioactive material? ☐ Yes ☑ No
   a. If yes, is disposal regulated by the Nuclear Regulatory Commission? ☐ Yes ☐ No
   b. If yes, is disposal regulated by a State Agency for radioactive waste/NORM? ☐ Yes ☐ No
5. Does the waste represented by this waste profile sheet contain concentrations of regulated Polychlorinated Biphenyls (PCBs)? ☐ Yes ☑ No
   a. If yes, is disposal regulated under TSCA? ☐ Yes ☑ No
6. Does the waste contain untreated, regulated, medical or infectious waste? ☐ Yes ☑ No
7. Does the waste contain asbestos? ☐ Yes ☑ No If Yes, ☐ Friable ☐ Non Friable
8. Is this profile for remediation waste from a facility that is a major source of Hazardous Air Pollutants (Site Remediation NESHAP, 40 CFR 63 subpart GGGGG)? ☐ Yes ☑ No
   If yes, does the waste contain <500 ppmw VOHAPs at the point of determination? ☒ Yes ☐ No

## E. Generator Certification (Please read and certify by signature below)

By signing this Generator's Waste Profile Sheet, I hereby certify that all:

1. Information submitted in this profile and all attached documents contain true and accurate descriptions of the waste material; ✓
2. Relevant information within the possession of the Generator regarding known or suspected hazards pertaining to this waste has been disclosed to WM/the Contractor; ✓
3. Analytical data attached pertaining to the profiled waste was derived from testing a representative sample in accordance with 40 CFR 261.20(c) or equivalent rules; and ✓
4. Changes that occur in the character of the waste (i.e. changes in the process or new analytical) will be identified by the Generator and disclosed to WM (and the Contractor if applicable) prior to providing the waste to WM (and the Contractor if applicable). ✓
5. Check all that apply:
   - ☑ Attached analytical pertains to the waste. Identify laboratory & sample ID #'s and parameters tested: _____ # Pages: _____
   - ☑ Only the analyses identified on the attachment pertain to the waste (identify by laboratory & sample ID #'s and parameters tested). Attachment #: Test America LFDW02
   - ☐ Additional information necessary to characterize the profiled waste has been attached (other than analytical). Indicate the number of attached pages: _____
   - ☐ I am an agent signing on behalf of the Generator, and the delegation of authority to me from the Generator for this signature is available upon request.
   - ☐ By Generator process knowledge, the following waste is not a listed waste and is below all TCLP regulatory limits.

**Certification Signature:** Jeremy Flint **Title:** Environmental Engineer

**Company Name:** Alliant Techsystems Inc. **Name (Print):** Jeremy Flint

**Date:** 7/8/09

## FOR WM USE ONLY

**Management Method:** ☑ Landfill ☐ Bioremediation ☐ Non-hazardous solidification ☐ Other: _____

**Approval Decision:** ☑ Approved ☐ Not Approved

**Waste Approval Expiration Date:** 7/8/10

**Management Facility Precautions, Special Handling Procedures or Limitation on approval:** _____

- ☐ Shall not contain free liquid
- ☐ Shipment must be scheduled into disposal facility
- ☐ Approval Number must accompany each shipment
- ☐ Waste Manifest must accompany load

**WM Authorization Name / Title:** _____ **Date:** 7/8/09

**State Authorization (if Required):** _____ **Date:** _____

## Quality Control Reports

**RADFORD ARSENAL**
**OPERATIONS DAILY REPORT**
**Shaw Project No. 123461**
**SWMU 39 / SWMU 51**

**Wednesday, July 15, 2009**

**Weather:**
Sunny/Warm 75 - 85 degress today

**Description of Work:**
Crew onsite this morning at 0700, continuing work at SWMU 39 (backfill)
JWB trucks at gate 10 getting inspected and signed in for today
Incinerator running and backfill continues with 8 trucks running today, incinerator running out by 4:00 pm
At end of day moved equipment out of SWMU 39, dozer to SWMU 51 and Excavator to FLFA

| Backfill SWMU 39 | Loads | Total Cyds |

**RADFORD ARSENAL**
**OPERATIONS DAILY REPORT**
**Shaw Project No. 123461**
**FLFA/SWMU 39/SWMU51**

**Wednesday, July 22, 2009**

**Weather:**
Partly Cloudy today 55-75 degrees

**Description of Work:**
On site at FLFA, tailgat held and work plan discussed with crew
Thompson trucking scheduled 6 trucks today, staggered 1 hour apart
Trucks are permitted 5% for hauling when not using interstate highway system which they will not to get to landfill
Weighing trucks before and after at ATK scalehouse by shipping and receiving
Continued excavating after loadout completed, discovered buried drum (30 gal) and stopped work, notified ATK and USACE and waited for response from Fire Dept and Safety Dept. Drum removed at ATK's direction and liquid sampled. Overpacked drum in a 55 gallon steel drum and moved to storage area, continued excavation after drum secured

**Check the Topics/Information Reviewed:**

_X_ safety glasses, hard hat, safety boots
_X_ site safety plan review and location
_X_ equipment and machinery familiarization
__ employee Right-To-Know/MSDS location
_X_ open pits, excavations, and site hazards
_X_ vehicle safety and driving/road conditions
_X_ portable tool safety and awareness
_X_ overhead utility locations and clearance
_X_ first aid, safety, and PPE location
__ sharp object, rebar, and scrap metal hazards
_X_ safety is everyone's responsibility
__ latex gloves inner/nitrile gloves outer
_X_ excavation/trenching inspections/documentation
__ full face respirators with proper cartridges
_X_ upgrade to level c at: PID (___ eV ) >_10_ ppm
_X_ work stoppage at: PID(___ eV) >___ ppm, % LEL > 10%

_X_ slips, trips, and falls
_X_ directions to hospital
__ anticipated visitors
__ electrical ground fault
_X_ public safety and fences
_X_ excavator swing and loading
_X_ orderly site and housekeeping
_X_ smoking in designated areas
_X_ leather gloves for protection
__ effects of the night before
__ vibration related injuries
_X_ fire extinguisher locations
_X_ eye wash station locations
_X_ decontamination procedures

_X_ daily work scope
_x_ emergency protocol
__ parking and laydown
_X_ hot work permits
_X_ strains and sprains
_X_ noise hazards
_X_ no horseplay
_X_ heat and cold stress
_X_ backing up hazards
_X_ accidents are costly
_X_ dust and vapor control
_X_ refueling procedures
__ confined space entry
__ flying debris hazards

**Tasks:** Excavation of contaminated Sludge and direct load into trucks for transportation to disposal facility. Escort of trucks required by Arsenal security and No Smoking, lighters or matches allowed inside gates. Stop for Arsenal trucks when hauling explosives and stay away from magazine buildings on either side of our site by 50 feet.

**Discussion/Comments/Follow-up Actions:** Air monitoring will be conducted during excavation and loading operations

*Note: Use the back of this sheet if necessary for daily task description and discussion*

S. KRITAK / S. BANKS

**SUPERVISION/FOREMAN** _____

Consider the following and check the items which apply to the job, then review with the work crew.

**PERMITS**
- ✓ Required
- ___ Cold Work
- ___ Hot Work
- ✓ Entry Permit (ATK)
- ✓ All Conditions Met
- ✓ Signed Off When Complete
- ___ Other

**PERSONAL PROTECTIVE EQUIP. (PPE)**
- X Type of Gloves
- X Composition of Gloves
- ___ Special Purpose Gloves
- ___ Tyvek Suit
- ___ Acid Suit /Slicker Suit
- ___ Rubber Boots
- ___ Mono Goggles (vented/non-vented)
- ___ Face Shield
- ___ Respirator
- ___ Fresh Air
- ___ Ear Protection
- ___ Safety Harness
- ___ Burning Goggles
- ___ Other

**TOOLS**
- X Current Inspection
- X Proper Tools for the Job
- X Good Tool Condition
- X Qualifications
- ___ Other

**EMERGENCY EQUIPMENT**
- X Fire Extinguishers
- ___ Safety Shower
- X Evacuation Route
- ___ Other

**ACCESS**
- ___ Scaffold (properly inspected)
- ___ Ladder (Tied off)
- ___ Manlift
- ___ Personnel Basket (inspected & approved)
- ___ Operator Training
- ___ Special Provisions
- ___ Other

**WELDING**
- ___ Flashburns
- ___ Combustibles
- ___ Spark Containment
- ___ Shields
- ___ Grounding
- ___ Water Hose
- ___ Fire Extinguisher
- ___ Fire Blanket
- ___ Fire Watch
- ___ Sewer Covers
- ___ Other

**OVERHEAD WORK**
- X Barricades
- ___ Signs
- ___ Hole Cover
- ___ Handrail
- ___ Other

**ELECTRICAL**
- ___ Locked & Tagged out
- ___ Try Start/Stop Switch
- X GFCI Test
- X Assured Grounding
- X Extension Cord Inspection
- ___ Other

**LIFTING**
- ___ Forklift
- ___ Cherry Picker
- ___ Load Chart
- ___ Angle
- ___ Crane
- ___ Chainfall
- X Proper Rigging Practices
- X Manual Lifting
- X Condition of Equipment
- ___ Operator Certificate

**HAZARDS (ENVIRONMENTAL)**
- ___ Electrical Shock
- ___ Heat Stress
- ___ Heavy Objects
- ___ Hot/Cold Surf. Or Mat.
- ___ Inadequate Lighting
- ___ Line Breaking
- ___ Noise
- ___ Poor Access/Egress
- ___ Sharp Objects
- ___ Other

**HAZARDS/CHEMICALS**
- ___ Chemical Burn Shin/Eyes
- ___ Flammable
- ___ Ingestion
- ___ Inhalation
- ___ Skin Contamination

**HAZARDS/BODY**
- ___ Fall Potential
- ___ Pinch Points
- ___ Slip-Trip Potential
- ___ Other

**OTHER WORK IN AREA**
- ___ Others Working Overhead
- ___ Type Work Others Doing
- ___ PPE Due to Other Work
- ✓ Other WATCH FOR EXPLOSIVE TRANSPORT TRUCKS

**Confined Space**

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

# JOB SAFETY ANALYSIS

DATE: 4/7/09
JOB#:
PERMIT#: 123461
ISSUED BY:

**Location of Job** RFAAP - SWMU 39 and SWMU 51
(Unit/Location on Project):STA 1 WEST

Required PPE:

LEVEL D

Pre-Job Preparation

1. Fill out JSA
2. Review JSA (EVERYONE)
3. Sign JSA (EVERYONE)

**Safety Access/ Location**

Safe Haven: Gate 10
Wind Direction: N/A
Evacuation Route: Follow Transport Route
Assembly Point: Gate 10

Supervisor of Work: S. Kratak
JSA Prepared By: Same
Are other crews in area No

New: X
Revised:

**Job Task**
(What are You Doing)

Prepare entry ramp into SWMU 39 pond A
BACKFILL AT SWMU 51 (10 15' lifts)
Compact at SWMU 51 w/ bucket (only)

**Site Cleanup**

* Work out details of Excavating windrows at ponds.

**Potential Hazards**

Equipment operations
Excavation Safety
Traffic through Plant (Right of way to Explosive Trucks and escorted Vehicles)
Slip Trip Fall
Cold Stress

**Recommended Action or Procedure**

Follow Standard Shaw SOP's
Follow RFAAP Safety Policies

**Audit the Job**
Audit Time:

# JOB SAFETY ANALYSIS

**DATE:**
**JOB#:**
**PERMIT#:**
**ISSUED BY:**

**SUPERVISION/FOREMAN** _____ _____

Consider the following and check the items which apply to the job, then review with the work crew.

**PERMITS**
- ___ Required
- ___ Cold Work
- X Hot Work
- X Entry Permit
- ___ All Conditions Met
- ___ Signed Off When Complete
- ___ Other _____

**PERSONAL PROTECTIVE EQUIP. (PPE)**
- X Type of Gloves
- X Composition of Gloves
- ___ Special Purpose Gloves
- ___ Tyvek Suit
- ___ Acid Suit /Slicker Suit
- ___ Rubber Boots
- ___ Mono Goggles (vented/non-vented)
- X Face Shield
- ___ Respirator
- ___ Fresh Air
- X Ear Protection
- ___ Safety Harness
- ___ Burning Goggles
- X Other _____

**TOOLS**
- X Current Inspection
- X Proper Tools for the Job
- X Good Tool Condition
- X Qualifications
- ___ Other _____

**EMERGENCY EQUIPMENT**
- X Fire Extinguishers
- ___ Safety Shower
- X Evacuation Route
- ___ Other _____

**ACCESS**
- ___ Scaffold (properly inspected)
- ___ Ladder (Tied off)
- ___ Manlift
- ___ Personnel Basket (inspected & approved)
- ___ Operator Training
- ___ Special Provisions
- ___ Other

**WELDING**
- ___ Flashburns
- ___ Combustibles
- ___ Spark Containment
- ___ Shields
- ___ Grounding
- ___ Water Hose
- ___ Fire Extinguisher
- ___ Fire Blanket
- ___ Fire Watch
- ___ Sewer Covers
- ___ Other _____

**OVERHEAD WORK**
- X Barricades
- ___ Signs
- ___ Hole Cover
- ___ Handrail
- ___ Other _____

**ELECTRICAL**
- ___ Locked & Tagged out
- ___ Try Start/Stop Switch
- X GFCI Test
- X Assured Grounding
- X Extension Cord Inspection
- ___ Other _____

**LIFTING**
- ___ Forklift
- ___ Cherry Picker
- ___ Load Chart
- ___ Angle
- ___ Crane
- ___ Chainfall
- X Proper Rigging Practices

# JOB SAFETY ANALYSIS

**DATE:**
**JOB#:**
**PERMIT#:**
**ISSUED BY:**

**SUPERVISION/FOREMAN** _____ _____

Consider the following and check the items which apply to the job, then review with the work crew.

**PERMITS**
- ___ Required
- ___ Cold Work
- X Hot Work
- X Entry Permit
- ___ All Conditions Met
- ___ Signed Off When Complete
- ___ Other _____

**PERSONAL PROTECTIVE EQUIP. (PPE)**
- X Type of Gloves
- X Composition of Gloves
- ___ Special Purpose Gloves
- ___ Tyvek Suit
- ___ Acid Suit /Slicker Suit
- ___ Rubber Boots
- ___ Mono Goggles (vented/non-vented)
- X Face Shield
- ___ Respirator
- ___ Fresh Air
- X Ear Protection
- ___ Safety Harness
- ___ Burning Goggles
- X Other _____

**TOOLS**
- X Current Inspection
- X Proper Tools for the Job
- X Good Tool Condition
- X Qualifications
- ___ Other _____

**EMERGENCY EQUIPMENT**
- X Fire Extinguishers
- ___ Safety Shower
- X Evacuation Route
- ___ Other _____

**ACCESS**
- ___ Scaffold (properly inspected)
- ___ Ladder (Tied off)
- ___ Manlift
- ___ Personnel Basket (inspected & approved)
- ___ Operator Training
- ___ Special Provisions
- ___ Other

**WELDING**
- ___ Flashburns
- ___ Combustibles
- ___ Spark Containment
- ___ Shields
- ___ Grounding
- ___ Water Hose
- ___ Fire Extinguisher
- ___ Fire Blanket
- ___ Fire Watch
- ___ Sewer Covers
- ___ Other _____

**OVERHEAD WORK**
- X Barricades
- ___ Signs
- ___ Hole Cover
- ___ Handrail
- ___ Other _____

**ELECTRICAL**
- ___ Locked & Tagged out
- ___ Try Start/Stop Switch
- X GFCI Test
- X Assured Grounding
- X Extension Cord Inspection
- ___ Other _____

**LIFTING**
- ___ Forklift
- ___ Cherry Picker
- ___ Load Chart
- ___ Angle
- ___ Crane
- ___ Chainfall
- X Proper Rigging Practices
- X Manual Lifting
- X Condition of Equipment
- ___ Operator Certificate

**HAZARDS (ENVIRONMENTAL)**
- ___ Electrical Shock
- ___ Heat Stress
- ___ Heavy Objects
- ___ Hot/Cold Surf. Or Mat.
- ___ Inadequate Lighting
- ___ Line Breaking
- X Noise
- ___ Poor Access/Egress
- ___ Sharp Objects
- ___ Other _____

**HAZARDS/CHEMICALS**
- ___ Chemical Burn Shin/Eyes
- ___ Flammable
- ___ Ingestion

## Confined Space

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

SUPERVISOR/FOREMAN RECOMMENDATION: ASK FOR HELP IF YOU NEED IT OR ARE NOT 100% SURE ABOUT YOUR TASK.

# JOB SAFETY ANALYSIS

**DATE:**
**JOB#:**
**PERMIT#:**
**ISSUED BY:**

**SUPERVISION/FOREMAN** _____ _____

Consider the following and check the items which apply to the job, then review with the work crew.

**PERMITS**
- ___ Required
- ___ Cold Work
- X Hot Work
- X Entry Permit
- ___ All Conditions Met
- ___ Signed Off When Complete
- ___ Other _____

**PERSONAL PROTECTIVE EQUIP. (PPE)**
- X Type of Gloves
- X Composition of Gloves
- ___ Special Purpose Gloves
- ___ Tyvek Suit
- ___ Acid Suit /Slicker Suit
- ___ Rubber Boots
- ___ Mono Goggles (vented/non-vented)
- X Face Shield
- ___ Respirator
- ___ Fresh Air
- X Ear Protection
- ___ Safety Harness
- ___ Burning Goggles
- X Other _____

**TOOLS**
- X Current Inspection
- X Proper Tools for the Job
- X Good Tool Condition
- X Qualifications
- ___ Other _____

**EMERGENCY EQUIPMENT**
- X Fire Extinguishers
- ___ Safety Shower
- X Evacuation Route
- ___ Other _____

**ACCESS**
- ___ Scaffold (properly inspected)
- ___ Ladder (Tied off)
- ___ Manlift
- ___ Personnel Basket (inspected & approved)
- ___ Operator Training
- ___ Special Provisions
- ___ Other

**WELDING**
- ___ Flashburns
- ___ Combustibles
- ___ Spark Containment
- ___ Shields
- ___ Grounding
- ___ Water Hose
- ___ Fire Extinguisher
- ___ Fire Blanket
- ___ Fire Watch
- ___ Sewer Covers
- ___ Other _____

**OVERHEAD WORK**
- X Barricades
- ___ Signs
- ___ Hole Cover
- ___ Handrail
- ___ Other _____

**ELECTRICAL**
- ___ Locked & Tagged out
- ___ Try Start/Stop Switch
- X GFCI Test
- X Assured Grounding
- X Extension Cord Inspection
- ___ Other _____

**LIFTING**
- ___ Forklift
- ___ Cherry Picker
- ___ Load Chart
- ___ Angle
- ___ Crane
- ___ Chainfall
- X Proper Rigging Practices
- X Manual Lifting
- X Condition of Equipment
- ___ Operator Certificate

**HAZARDS (ENVIRONMENTAL)**
- ___ Electrical Shock
- ___ Heat Stress
- ___ Heavy Objects
- ___ Hot/Cold Surf. Or Mat.
- ___ Inadequate Lighting
- ___ Line Breaking
- X Noise
- ___ Poor Access/Egress
- ___ Sharp Objects
- ___ Other _____

**HAZARDS/CHEMICALS**
- ___ Chemical Burn Shin/Eyes
- ___ Flammable
- ___ Ingestion
- ___ Inhalation
- ___ Skin Contamination

**HAZARDS/BODY**
- ___ Fall Potential
- ___ Pinch Points
- ___ Slip-Trip Potential
- ___ Other _____

**OTHER WORK IN AREA**
- ___ Others Working Overhead
- ___ Type Work Others Doing
- ___ PPE Due to Other Work
- ___ Other _____

**Confined Space**

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

SUPERVISOR/FOREMAN RECOMMENDATION: ASK FOR HELP IF YOU NEED IT OR ARE NOT 100% SURE ABOUT YOUR TASK.

## Confined Space

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

SUPERVISOR/FOREMAN RECOMMENDATION: ASK FOR HELP IF YOU NEED IT OR ARE NOT 100% SURE ABOUT YOUR TASK.

## Confined Space

Know the Following:

- Possible hazards within the confined space
- First signs of exposure
- How to summons help
- How to track personnel
- Entering and exiting the confined space
- Maintain contact with all entrants by voice or visual
- Do not attempt to rescue unless you are a part of a coordinated effort
- Remain at entry point assume no duties with take you from there.

SUPERVISOR/FOREMAN RECOMMENDATION: ASK FOR HELP IF YOU NEED IT OR ARE NOT 100% SURE ABOUT YOUR TASK.
