FVO4-01 Data Review Checklist

INDEPENDENT DATA REVIEW CHECKLIST		Method: GCMS (EPA SW-846 8260C)					
Analysis Date	LIMs Run #(s):	Analyst/Data Interpreter	Independent Reviewer	Date of Review	Approved? Yes	Approved? No	Instrument
04/21/2016	124904	AGK	RLD	04/26/2016	Yes		VMS4
Instructions: Complete one checklist per analytical sequence. Enter the appropriate response for each question. Each "No" response requires an explanation in the Comments section and may require the initiation of a Nonconformance Report.							

Requirement:	Acceptance criteria	Analyst Review Yes	Analyst Review No	Independent Review Yes	Independent Review No	Comments:
I. BFB Tune Check						
Was a BFB tune check analyzed with acceptable results?	Relative abundance criteria met?	Yes		Yes		If no, Do not proceed with analyses.
II. Initial Calibration Verification (ICV)						
Was initial calibration performed using a minimum of five standard concentration levels (minimum of 6 levels for quadratic curves)?	Lowest standard at or below RL?	Yes		Yes		If no, recalibrate with required # of levels
Were the Average Relative Response Factors (ARRF) acceptable?	ARRF≥ specified limits (see SOP)	Yes		Yes		If no, analyses stopped, recalibrate.
Was a second-source ICV analyzed?	Required before sample analyses.	Yes		Yes		If no, analyze prior to sample analyses.
Were all target compound %Deviation or %Drift acceptable?	%D < 20% or project/program specific	Yes		Yes		If no, reanalyzed ICV to address failures
Was Initial Calibration Blank (ICB) analyzed?	Required before sample analyses.	Yes		Yes		If no, analyzed ICB before sample analyses.
Were the ICB results for all target analytes less than the limit of detection (LOD).	<LOD or < project/program specific limits	Yes		Yes		If no, analyze another blank to address detects.
III. Continuing Calibration Verification (CCV)						
Was an acceptable BFB tune check run at the beginning of every twelve hour shift?	Relative abundance criteria met?	Yes		Yes		If no, reanalyze BFB until acceptable; re-tuning the instrument may be necessary.
Was a CCV analyzed after every 12 hour tune check?	Required before sample analyses.	Yes		Yes		If no, analyzed CCV after acceptable tune check.
Were all target compound %Deviation or %Drift acceptable?	%D < 20% or project/program specific	Yes		Yes		If no, reanalysis or recalibration may be required.
If necessary, were the results for outlying compounds qualified?						If yes, results qualified "Z"

IV. Blanks						
Was a Method Blank (MB) analyzed prior to analysis of samples?	1 per 20 samples or project/program specific.	Yes		Yes		If no, analyze a MB with each sample batch.
Were the MB results for all target analytes less than the limit of detection (LOD)?	*All target analytes <LOD or < project/program specific limits (<1/2 RL for DoD-QSM)	Yes		Yes		If no, reanalyze MB an all affected data if possible or see SOP for more detailed criteria
If analytes were detected in the MB with no associated positives in the samples, no further action is needed. If the analyte detects in the MB were greater than the acceptance criteria and there were detects in the samples, was the data qualified.?						If yes, affected results qualified "B"
V. Laboratory Control Spike (LCS)						
Was a LCS analyzed at the required frequency?	1 per 20 samples or project/program specific.	Yes		Yes		If no, analyze a LCS with each sample batch.
Were the LCS recoveries for all analytes within acceptance criteria?	Default 70-130%, or see internally generated limits, or project/program specified limits.	Yes		Yes		If no, Reanalyze LCS and all affected data if possible or data requires qualification.
If applicable, were associated sample detects (and non-detects for low recoveries) qualified?						If yes, affected results qualified "Q"
VI. Matrix Spike/Matrix Spike Duplicate (MS/MSD)						
Was a Martrix Spike (MS) and a Matrix Spike Duplicate (MSD) analyzed at the required frequency?	1 per 20 samples or project/program specific.	Yes		Yes		If no, analyze a MS/MSD pair with each sample batch.
Were the MS/MSD recoveries for all analytes within acceptance criteria?	Default 70-130%, or see internally generated limits, or project/program specified limits.	Yes		Yes		If no, qualify detects (with an "M" flag) in the parent sample, also qualify non-detects if MS/MSD recoveries were low.
Is the relative percent difference (RPD) for each analyte between the MS and MSD acceptable?	generated limits, or client specific limits.	Yes		Yes		If no, affected results qualified "Y"
VII. Sample Analyses						
Are chromatogram characteristics, including peak shapes and areas, consistent with those of the CCV?		Yes		Yes		If no, instrument maintenance may be required to correct problems.
Were surrogate recoveries for all samples and QC within acceptance criteria?	Default 70-130%, or see internally generated program limits, or client specified limits.	Yes		Yes		If no, samples with high surrogate recoveries and no associated analyte detects were not reanalyzed. Low surrogate recoveries require reanalysis.
If possible, were the affected samples reanalyzed?						If no, see below **
**Were reported sample results with failing surrogate recoveries qualified?						If yes, affected results qualified "S"
Were all samples having analytes detected in amounts exceeding the calibration range diluted and reanalyzed? If not qualify (X).	Target upper middle range of calibration curve.	Yes		Yes		
Did all samples meet hold time and preservation criteria as defined by method/program?	H2O sample: pH < 2 = 14 days, pH >2 = 7 days. Soil samples: 14 days (other criteria may apply)	Yes		Yes		If no, see below: If analyzed past hold, qualify "H" If improperly preserved qualify "T"
Were all samples and QC injected within 12 hours of BFB tune check?		Yes		Yes		If no, affected samples reanalyzed
Were internal standard recoveries acceptable relevant to associated ICAL?	Response = -50 to +200%; Ret. time = +/- 30 sec.	Yes		Yes		If no, affected samples reanalyzed

VIII. Records and Reporting						
Is sequence file / injection log present in the data package?		Yes		Yes		If no, include sequence run with raw data.
Were all data, calculations, and values verified in LIMS upon completion of data capture?		Yes		Yes		If no, recapture the data and verify data prior to validation.
Were manual integrations addressed properly and were the audit trails turned on (where applicable)?	Manual integration must be initialed, dated, and reason given, along with before & after chromatograms. Audit trail must be on (if available).	Yes		Yes		IF No, address manual integration and/or turn on audit trail feature and document reason why it may have been turned off.
Are reported results whose amounts exceeded the acceptance criteria flagged with an appropriate qualifier and, if needed, were any non-matrix related nonconformities documented in the NCR spreadsheet?		Yes		Yes		If No, include proper qualification(s) in LIMS and enter nonconformities into the NCR spreadsheet before data review/validation.

Non-applicable Yes/No cells are left blank

FVO1-01 Data Review Checklist

	FVO1-01 Method: Dissolved Gases (EPA SW-846 8015 / RSK 175 Modified)					
LIMS Run #(s)	Analysis Date (s)	Analyst / Data Interpreter	Independent Reviewer	Date of Review	Approved? (Yes or No)	Instrument
124662, 124865, 124866, 124867	04/14/2016, 04/15/2016	AMA	RLD	04/18/2016	Yes	PVOC4

Instructions: Complete one checklist per *analytical sequence* . Enter the appropriate response for each question. Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	Acceptance Criteria	Analyst Review		Independent Review		Comments: (indicate reference to an attachment if necessary)
1. INITIAL CALIBRATION (ICAL)		Yes	No	Yes	No	
a. Was the initial calibration performed using a minimum of five concentration levels?	Lowest standard at or below RL	Yes		Yes		If NO, recalibrate
b. For each analyte/component is the variation between calibration response factors for all concentration levels <20% RSD or is $r^2 \geq .99$ or $r \geq .995$ for the regression line?	RSD <20% or $r^2 \geq .99$ or $r \geq .995$ or program/project specific	Yes		Yes		If NO, recalibrate
c. Are the identification and date of the ICAL listed on the printout (or PDF) of the analytical run and in the method file?	ID# and date of ICAL listed	Yes		Yes		
d. Was an Initial Calibration Verification (ICV) analyzed after the ICAL?	Analyzed prior to sample analyses	Yes		Yes		If NO, analyze ICV prior to sample analyses.
e. Were the recoveries for each analyte in the ICV within required limits?	Recoveries 85 - 115% or within program/project specific limits	Yes		Yes		If NO, reanalyze ICV. If still No then necessary maintenance and recalibration should be performed.
f. Was an Initial Calibration Blank (ICB) analyzed?		Yes		Yes		If NO, reanalyze ICB before sample analyses.
g. Were the ICB results for all target analytes/components less than the reporting limit (RL)?	<RL or < program/project specific	Yes		Yes		
3. CONTINUING CALIBRATION VERIFICATION (CCV)						
a . Was a CCV analyzed at the beginning and end of a sequential analysis run, as well as after ever 10 samples?		Yes		Yes		If NO, then samples / QC in the affected window must be reanalyzed.
b. Were the recoveries for each analyte/component in the CCV within acceptance criteria?	Recoveries 85 - 115% or within program/project specific limits	Yes		Yes		If NO, then necessary maintenance and possible recalibration should be performed. Affected samples must be reanalyzed for compounds exceeding CCV criteria.
4. METHOD BLANKS (MB)						
a. Was a method blank (MB) analyzed?	1 / 20 or program/project specific	Yes		Yes		If NO, reanalyze sample batch with an associated MB.
b. Were the MB results for all analytes/components less than reporting limit?	All target analytes/components <RL or within program/project specific limits (DoD-QSM: <1/2 the RL)	Yes		Yes		If analytes/components were detected in the MB with no associated positives in the samples, no further action is needed. If analyte detects are greater than the RL with associated positives in the samples, flag associated positives with a "B" qualifier.
5. LABORATORY CONTROL SAMPLE (LCS)						
a. Was a LCS analyzed at the required frequency?	1 / 20 or program/project specific	Yes		Yes		If NO, reanalyze sample batch with an associated LCS.
b. Were LCS recoveries for all analytes within the acceptance criteria?	Default = 70-130%, or within In-house generated or program/project specific limits	Yes		Yes		If NO, reanalyze LCS to confirm no preparation error.
c. If LCS recoveries exceed acceptance criteria, was the LCS reanalyzed in an effort to eliminate the possibility of a preparation error?						If LCS recoveries exceed acceptance criteria again, investigate and correct problem and reanalyze affected samples, if possible. If LCS recoveries exceed criteria after sample reanalysis and if samples are not reanalyzed, See Below: *If LCS recovery is high with no associated positives in samples, no further action needed. *If LCS recovery is high with associated positives in samples, flag associated positives "Q". *If LCS recoveries are low, flag all affected analytes/components within the batch "Q".

6. MATRIX SPIKE (MS)/ MATRIX SPIKE DUPLICATES (MSD) and DUPLICATE						
a. Was a MS, MSD, and/or Duplicate (if valid) Vial analyzed with each batch of 20 samples (or program-specified frequency)?	1 / 20 or program/project specific frequency (QSM samples, duplicate only valid if sample result ≥ 5x the LOQ)	Yes		Yes		If NO, analyze a MS/MSD from the specific sample batch. When insufficient sample amount is provided for matrix spikes, preparing a sample in duplicate is possible.
b. Were MS/MSD recoveries for all analytes within acceptance criteria?	Default =70-130%, or within In-house generated or program/project specific limits		No		No	If NO, See Below: *If MS/MSD recoveries are below acceptable limits, and unspiked sample has detects or no detects for affected analytes, flag affected analytes "M". *If MS/MSD recoveries are above acceptable limits, and the unspiked sample has no detects for affected analytes, no action is required. *If MS/MSD recoveries are outside of acceptable limits, and unspiked sample has detects for affected analytes, flag affected analytes "M" in parent sample.
7. PRECISION						
a. Is the relative percent difference (RPD) for each analyte between duplicate QC samples (i.e. parent sample / Duplicate vial), or for each MS/MSD within the acceptance criteria?	Default = 20 % RPD, or within In-house generated or program/project specific limits	Yes		Yes		If NO, "Y" flag all affected compounds in the unspiked sample if the precision failure is between the MS and MSD or the parent sample if the precision failure is between a duplicate samples.
8. SAMPLES (INCLUDING BLANKS, STANDARDS, AND QC SAMPLES)						
a. Are chromatogram characteristics, including peak shapes and areas, consistent with those of the CCV?		Yes		Yes		If NO, document any discrepancies. Manual integrations should include before and after chromatography. Manual integrations should be signed and dated.
b. Were all samples having analytes detected in amounts exceeding the calibration range diluted and reanalyzed or reanalyzed using a smaller sample aliquot? Affected analyte detects should remain above the limit of quantitation (LOQ) after reanalysis.		Yes		Yes		If NO, dilute and reanalyze samples for compounds exceeding calibration range.
c. Was the correct ambient temperature recorded on sample spreadsheets?		Yes		Yes		If NO, sample must be reanalyzed. Temperature must be documented.
d. Were all samples adequately preserved and analyzed within holding time?	CO2 samples received unpreserved (analyze within 7 days or program/project specific) Methane, Ethene, Ethane samples received preserved to <2 (analyze within 14 days or program/project specific)	Yes		Yes		If NO, qualify samples analyzed past hold time with an "H" flag. Sample improperly preserved should be qualified with a "T" flag.
9. RECORDS AND REPORTING						
a. Is a sequence run file present in the raw data file?		Yes		Yes		If NO, include sequence run with raw data.
b. Is the data initialed and dated by analyst?	Analysis Run sheet is initialed & dated by the analyst processing the raw data.	Yes		Yes		If NO, if no obtain initials and date from analyst.
c. Do all values, units, etc. listed match the raw data and associated calculations and records?		Yes		Yes		If NO, data should be reprocessed to include correct units and results.
e. Has the data been electronically transferred to the LIMS and were the applicable qualifiers assigned?		Yes		Yes		If NO, recapture data. Manual entries into LIMS must be documented to ensure proper review.
f. Were manual integrations addressed properly and were the audit trails turned on (where applicable)?	Manual integration must be initialed, dated, and reason given, along with before & after chromatograms. Audit trail must be on (if available).	Yes		Yes		If NO, address manual integration and/or turn on audit trail feature and document reason why it may have been turned off.
g. Are reported results whose amounts exceeded the acceptance criteria flagged with an appropriate qualifier in LIMS and, if needed, were any non-matrix related nonconformities documented in the NCR spreadsheet?		Yes		Yes		If NO, include proper qualification(s) in LIMS and enter nonconformities into the NCR spreadsheet before data review/validation.

FVO1-01 Data Review Checklist

	FVO1-01 Method: Dissolved Gases (EPA SW-846 8015 / RSK 175 Modified)					
LIMS Run #(s)	Analysis Date (s)	Analyst / Data Interpreter	Independent Reviewer	Date of Review	Approved? (Yes or No)	Instrument
125088, 125089, 125091	04/20/2016	AMA	RLD	04/26/2016	Yes	PVOC4

Instructions: Complete one checklist per *analytical sequence* . Enter the appropriate response for each question. Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	Acceptance Criteria	Analyst Review		Independent Review		Comments: (indicate reference to an attachment if necessary)
1. INITIAL CALIBRATION (ICAL)		Yes	No	Yes	No	
a. Was the initial calibration performed using a minimum of five concentration levels?	Lowest standard at or below RL	Yes		Yes		If NO, recalibrate
b. For each analyte/component is the variation between calibration response factors for all concentration levels <20% RSD or is $r^2 \geq .99$ or $r \geq .995$ for the regression line?	RSD <20% or $r^2 \geq .99$ or $r \geq .995$ or program/project specific	Yes		Yes		If NO, recalibrate
c. Are the identification and date of the ICAL listed on the printout (or PDF) of the analytical run and in the method file?	ID# and date of ICAL listed	Yes		Yes		
d. Was an Initial Calibration Verification (ICV) analyzed after the ICAL?	Analyzed prior to sample analyses	Yes		Yes		If NO, analyze ICV prior to sample analyses.
e. Were the recoveries for each analyte in the ICV within required limits?	Recoveries 85 - 115% or within program/project specific limits	Yes		Yes		If NO, reanalyze ICV. If still No then necessary maintenance and recalibration should be performed.
f. Was an Initial Calibration Blank (ICB) analyzed?		Yes		Yes		If NO, reanalyze ICB before sample analyses.
g. Were the ICB results for all target analytes/components less than the reporting limit (RL)?	<RL or < program/project specific	Yes				
3. CONTINUING CALIBRATION VERIFICATION (CCV)						
a . Was a CCV analyzed at the beginning and end of a sequential analysis run, as well as after ever 10 samples?		Yes		Yes		If NO, then samples / QC in the affected window must be reanalyzed.
b. Were the recoveries for each analyte/component in the CCV within acceptance criteria?	Recoveries 85 - 115% or within program/project specific limits	Yes		Yes		If NO, then necessary maintenance and possible recalibration should be performed. Affected samples must be reanalyzed for compounds exceeding CCV criteria.
4. METHOD BLANKS (MB)						
a. Was a method blank (MB) analyzed?	1 / 20 or program/project specific	Yes		Yes		If NO, reanalyze sample batch with an associated MB.
b. Were the MB results for all analytes/components less than reporting limit?	All target analytes/components <RL or within program/project specific limits (DoD-QSM: <1/2 the RL)	Yes		Yes		If analytes/components were detected in the MB with no associated positives in the samples, no further action is needed. If analyte detects are greater than the RL with associated positives in the samples, flag associated positives with a "B" qualifier.
5. LABORATORY CONTROL SAMPLE (LCS)						
a. Was a LCS analyzed at the required frequency?	1 / 20 or program/project specific	Yes		Yes		If NO, reanalyze sample batch with an associated LCS.
b. Were LCS recoveries for all analytes within the acceptance criteria?	Default = 70-130%, or within In-house generated or program/project specific limits	Yes		Yes		If NO, reanalyze LCS to confirm no preparation error.
c. If LCS recoveries exceed acceptance criteria, was the LCS reanalyzed in an effort to eliminate the possibility of a preparation error?						If LCS recoveries exceed acceptance criteria again, investigate and correct problem and reanalyze affected samples, if possible. If LCS recoveries exceed criteria after sample reanalysis and if samples are not reanalyzed, See Below: *If LCS recovery is high with no associated positives in samples, no further action needed. *If LCS recovery is high with associated positives in samples, flag associated positives "Q". *If LCS recoveries are low, flag all affected analytes/components within the batch "Q".

6. MATRIX SPIKE (MS)/ MATRIX SPIKE DUPLICATES (MSD) and DUPLICATE						
a. Was a MS, MSD, and/or Duplicate (if valid) Vial analyzed with each batch of 20 samples (or program-specified frequency)?	1 / 20 or program/project specific frequency (QSM samples, duplicate only valid if sample result ≥ 5x the LOQ)	Yes		Yes		If NO, analyze a MS/MSD from the specific sample batch. When insufficient sample amount is provided for matrix spikes, preparing a sample in duplicate is possible.
b. Were MS/MSD recoveries for all analytes within acceptance criteria?	Default =70-130%, or within In-house generated or program/project specific limits		No		No	If NO, See Below: *If MS/MSD recoveries are below acceptable limits, and unspiked sample has detects or no detects for affected analytes, flag affected analytes "M". *If MS/MSD recoveries are above acceptable limits, and the unspiked sample has no detects for affected analytes, no action is required. *If MS/MSD recoveries are outside of acceptable limits, and unspiked sample has detects for affected analytes, flag affected analytes "M" in parent sample.
7. PRECISION						
a. Is the relative percent difference (RPD) for each analyte between duplicate QC samples (i.e. parent sample / Duplicate vial), or for each MS/MSD within the acceptance criteria?	Default = 20 % RPD, or within In-house generated or program/project specific limits		No		No	If NO, "Y" flag all affected compounds in the unspiked sample if the precision failure is between the MS and MSD or the parent sample if the precision failure is between a duplicate samples.
8. SAMPLES (INCLUDING BLANKS, STANDARDS, AND QC SAMPLES)						
a. Are chromatogram characteristics, including peak shapes and areas, consistent with those of the CCV?		Yes		Yes		If NO, document any discrepancies. Manual integrations should include before and after chromatography. Manual integrations should be signed and dated.
b. Were all samples having analytes detected in amounts exceeding the calibration range diluted and reanalyzed or reanalyzed using a smaller sample aliquot? Affected analyte detects should remain above the limit of quantitation (LOQ) after reanalysis.		Yes		Yes		If NO, dilute and reanalyze samples for compounds exceeding calibration range.
c. Was the correct ambient temperature recorded on sample spreadsheets?		Yes		Yes		If NO, sample must be reanalyzed. Temperature must be documented.
d. Were all samples adequately preserved and analyzed within holding time?	CO2 samples received unpreserved (analyze within 7 days or program/project specific) Methane, Ethene, Ethane samples received preserved to <2 (analyze within 14 days or program/project specific)	Yes		Yes		If NO, qualify samples analyzed past hold time with an "H" flag. Sample improperly preserved should be qualified with a "T" flag.
9. RECORDS AND REPORTING						
a. Is a sequence run file present in the raw data file?		Yes		Yes		If NO, include sequence run with raw data.
b. Is the data initialed and dated by analyst?	Analysis Run sheet is initialed & dated by the analyst processing the raw data.	Yes		Yes		If NO, if no obtain initials and date from analyst.
c. Do all values, units, etc. listed match the raw data and associated calculations and records?		Yes		Yes		If NO, data should be reprocessed to include correct units and results.
e. Has the data been electronically transferred to the LIMS and were the applicable qualifiers assigned?		Yes		Yes		If NO, recapture data. Manual entries into LIMS must be documented to ensure proper review.
f. Were manual integrations addressed properly and were the audit trails turned on (where applicable)?	Manual integration must be initialed, dated, and reason given, along with before & after chromatograms. Audit trail must be on (if available).	Yes		Yes		If NO, address manual integration and/or turn on audit trail feature and document reason why it may have been turned off.
g. Are reported results whose amounts exceeded the acceptance criteria flagged with an appropriate qualifier in LIMS and, if needed, were any non-matrix related nonconformities documented in the NCR spreadsheet?		Yes		Yes		If NO, include proper qualification(s) in LIMS and enter nonconformities into the NCR spreadsheet before data review/validation.

Sequence Summary Report

Sequence Filename: C:\InStarch\PVOC4\Sequence\020315DGIC.seq
Instrument: PVOC4
Processing Date: Feb 03, 2015 11:19:15

'Run Number	Sample ID	Data Filename	Method Filename	Run Time

Prep:	Into a 500 mL volumetric flask, partially filled with milli-Q H_2O, dissolved **60 g** NaCl M12270 and **60 g** hydroxylamine sulfate M12548 and brought up to volume.		

Standard Log #:	M12638	Standard:	GFAA Instrument Check
Analyst:	MDS	Final Concentration:	10 µg/L As 6 µg/L Pb 22 µg/L Tl 24 µg/L Sb, Se 0.8 µg/L Ag
Prep Date:	09/22/2015	Expiration Date:	11/08/2015

Into six, 100 mL volumetric flasks, add the following and bring up to volume with milli-Q H_2O.

Element	Volume Pipetted (mL)	Standard Conc. (µg/mL)	Standard ID	New Conc. (µg/L)
As	1	1000	M12315	10,000
Pb	0.1	10,000	M12313	10,000
Tl	1	1000	M11997	10,000
Se	1	1000	M12600	10,000
Sb	1	1000	M12602	10,000
Ag	0.1	1000	M12599	1000

Into a 1 L volumetric flask, add the following and bring up to volume with Milli-Q H_20. (1% HNO_3)

Element	Volume Pipetted (mL)	Standard Conc. (µg/L)	New Conc. (µg/L)
As	1	10,000	10
Pb	0.6	10,000	6
Tl	2.2	10,000	22
Se	2.4	10,000	24
Sb	2.4	10,000	24
Ag	0.8	1000	0.8

Prep:

Using 1 L volumetric flasks, pipetted the following and brought up to volume using milli-Q H_2O.
(5% HNO_3, 5% HCl)
1000 ug/L Std. - **10 mL** of Custom Assurance Std. #23 (100 mg/L Al, As, B, Ba, Ca, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn) M12558, **10 mL** of Custom Assurance Std. #3 (100 mg/L Ag, Be, Cd) M12530 and **1 mL** of Si (1000 mg/L) M11919.
0.25 ug/L Std. - **0.25 mL** of the 1000 ug/L Std.
0.5 ug/L Std. - **0.5 mL** of the 1000 ug/L Std.
1 ug/L Std. - **1 mL** of the 1000 ug/L Std.
5 ug/L Std. - **5 mL** of the 1000 ug/L Std.
10 ug/L Std. - **10 mL** of the 1000 ug/L Std.
20 ug/L Std. - **20 mL** of the 1000 ug/L Std.
50 ug/L Std. - **50 mL** of the 1000 ug/L Std.
100 ug/L Std. - **1 mL** of Custom Assurance Std. (CAS) #23 and **1 mL** of CAS #3
10,000 ug/L Std. - **100 mL** CAS #23, **100 mL** CAS #3 and **1 mL** of K (10,000 mg/L) M12474.
100k ug/L Std. - **10 mL** of Cu (10,000 mg/L) M12472, **10 mL** of Mn (10,000 mg/L) M12533, **10 mL** of Cr (10,000 mg/L) M12470, **10 mL** Pb (10,000 mg/L) M12313, **10 mL** of Zn (10,000 mg/L) M12005 and **10 mL** of Na (10,000 mg/L) M12010.
100,000 ug/L Std. - **10 mL** of Mg (10,000 mg/L) M12488, **10 mL** of Fe (10,000 mg/L) M12489, **10 mL** of Ca (10,000 mg/L) M12490 and **10 mL** Al (10,000 mg/L) M12400.
500,000 ug/L Std. - **50 mL** of Mg (10,000 mg/L), **50 mL** of Fe (10,000 mg/L), **50 mL** of Ca (10,000 mg/L) and **50 mL** of Al (10,000 mg/L)
1000k ug/L Std. - **100 mL** of Mg (10,000 mg/L), **100 mL** of Fe (10,000 mg/L), **100 mL** of Ca (10,000 mg/L) and **100 mL** of Al (10,000 mg/L)

FWC37-03 Data Review Checklist

LIMS RUN# 124798 124852 124864		Method: Anions by Ion Chromatography 300.0/9056	Independent Data Review Checklist		
Analysis Date	Analyst / Data Interpreter	Independent Reviewer	Date of Review	Approved (Yes/No)	Instrument
04/14/2016	JJF	RLD	04/18/2016	Yes	Metrohm-System 3

Instructions: Complete one checklist per *analytical sequence* . Enter the appropriate response for each question. Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	Acceptance	Analyst Review		Independent Review		Comments:
	Criteria	Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were the samples analyzed within hold time?	28 days for Cl, F, SO_4;14 days for preserved NO_2+NO_3; 48 hours for O.Phos, and unpreserved NO_2 and NO_3	Yes		Yes		If no: Qualify date with an "H" flag.
2. Was the calibration performed using the required number of standards?	Minimum three plus a blank	Yes		Yes		If no: reacalibrate instrument minimum of 3 standaard + a blank.
3. Is the standard prep log number noted on the analytical report bench sheet?	---	Yes		Yes		If no: document all standards used.
4. Was the correlation coefficient acceptable?	≥ .995	Yes		Yes		If no: Reacalibrate instrument
5. Were the ICV and ICB run immediately after the calibration check standard?	---	Yes		Yes		If no: Analyze an ICV and ICB prior to sample analyses.
6. Was the ICV recovery acceptable?	90 – 110 % or contract/program specific	Yes		Yes		If no: reanalyze ICV or recalibrate if necessary.
7. Was the ICB result acceptable?	< LOD or contract/program specific	Yes		Yes		If no: reanalyze blank. Instrument must be confirmed free from contamination prior to sample analyses.
8. Were the CCV's and the CCB's analyzed at the required frequency?	1 / 10 samples or contract/program specific	Yes		Yes		If no: outliers should be reanalyzed with QC samples anlayzed at the proper frequency.
9. Were the CCV recoveries acceptable?	90 – 110 % or contract/program specific	Yes		Yes		If no: reanalyze affected data with acceptable CCV results.
10. Were the CCB results acceptable?	< LOD or program/project specific	Yes		Yes		If no: reanalyze affected sample if possible; otherwise sample detects must be qualified with a "B" flag.
11. Was the MB analyzed at the required frequency?	1 / 20 samples or contract/program specific	Yes		Yes		If no: affected sample must be reanalyzed including the MB.
12. Were the MB results acceptable?	< LOD or contract/program specific	Yes		Yes		If no: reanalyze affected samples with an acceptable MB if possible. If sample result is >20x the result detected in the blank results can be reported without qualificaton. If sample result is <20x the MB result and the MB was not reanalyzed, sample result must be qualified with a "B" flag.

13. Was a LCS run at the required frequency?	1 / 20 samples or contract/program specific	Yes		Yes		If no: affected sample must be reanalyzed including the LCS.
14. Was the LCS recovery acceptable?	Within in-house or contract/program specific limits	Yes		Yes		If no: affected sample should be reanalyzed with accecptable LCS recoveries if possible. Detects reported with an LCS failure must be qualified with a "Q" flag. Nondetected analytes reported with a low LCS recovery must also be qualified with a "Q" flag.
15. Was the LCS used before the indicated expiration date?	---	Yes		Yes		If no: samples should be reanalyed with non expired standards.
16. Were the MS and MSD (when required) prepared at the required frequency?	1per 20 samples per matrix or contract/program specific	Yes		Yes		If no: analyze a MS and MSD (if needed) to be included with the sample data.
17. Were the MS and MSD (when required) recoveries acceptable?	Within In-house or contract/program specific limits		No		No	If no: qualify parent sample results with an "M" flag if recoveries were low. If recoveries were high then qualify any affected detects in the parent sample.
18. Was the RPD between the MS and MSD (when required) acceptable?	Within in house or contract/program specific limits	Yes		Yes		If no: qualify the parent sample result with a "Y" flag.
19. Was a sample duplicate prepared at the required frequency?	Contract/program specific or 1 per 20 samples (1 / 10 for SDWA samples)	Yes		Yes		If no: analyze one of the sample from the batch as a duplicate.
20. Was the duplicate within precision limits?	Within in-house or contract/program specific limits	Yes		Yes		If no: qualify the parent sample result with a "Y" flag.
21. Were all chromatograms checked to ensure accurate peak identification?	---	Yes		Yes		If no: review the IC data to ensure proper retention times and peak identification.
22. Are all samples on the job lists accounted for?	---	Yes		Yes		If no: include and analzye missing sample with another batch.
23. Were non-matrix related nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If no: Enter nonconformities into the NCR spreadsheet before data review/validation..

FWC37-03 Data Review Checklist

LIMS RUN# 124894 124895	Method: Anions by Ion Chromatography 300.0/9056		Independent Data Review Checklist		
Analysis Date	Analyst / Data Interpreter	Independent Reviewer	Date of Review	Approved (Yes/No)	Instrument
04/14/2016	JJF	RLD	04/20/2016	Yes	Metrohm-System 3

Instructions: Complete one checklist per *analytical sequence* . Enter the appropriate response for each question. Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	Acceptance	Analyst Review		Independent Review		Comments:
	Criteria	Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were the samples analyzed within hold time?	28 days for Cl, F, SO_4;14 days for preserved NO_2+NO_3; 48 hours for O.Phos, and unpreserved NO_2 and NO_3	Yes		Yes		If no: Qualify date with an "H" flag.
2. Was the calibration performed using the required number of standards?	Minimum three plus a blank	Yes		Yes		If no: reacalibrate instrument minimum of 3 standaard + a blank.
3. Is the standard prep log number noted on the analytical report bench sheet?	---	Yes		Yes		If no: document all standards used.
4. Was the correlation coefficient acceptable?	≥ .995	Yes		Yes		If no: Reacalibrate instrument
5. Were the ICV and ICB run immediately after the calibration check standard?	---	Yes		Yes		If no: Analyze an ICV and ICB prior to sample analyses.
6. Was the ICV recovery acceptable?	90 – 110 % or contract/program specific	Yes		Yes		If no: reanalyze ICV or recalibrate if necessary.
7. Was the ICB result acceptable?	< LOD or contract/program specific	Yes		Yes		If no: reanalyze blank. Instrument must be confirmed free from contamination prior to sample analyses.
8. Were the CCV's and the CCB's analyzed at the required frequency?	1 / 10 samples or contract/program specific	Yes		Yes		If no: outliers should be reanalyzed with QC samples anlayzed at the proper frequency.
9. Were the CCV recoveries acceptable?	90 – 110 % or contract/program specific	Yes		Yes		If no: reanalyze affected data with acceptable CCV results.
10. Were the CCB results acceptable?	< LOD or program/project specific	Yes		Yes		If no: reanalyze affected sample if possible; otherwise sample detects must be qualified with a "B" flag.
11. Was the MB analyzed at the required frequency?	1 / 20 samples or contract/program specific	Yes		Yes		If no: affected sample must be reanalyzed including the MB.
12. Were the MB results acceptable?	< LOD or contract/program specific	Yes		Yes		If no: reanalyze affected samples with an acceptable MB if possible. If sample result is >20x the result detected in the blank results can be reported without qualificaton. If sample result is <20x the MB result and the MB was not reanalyzed, sample result must be qualified with a "B" flag.

13. Was a LCS run at the required frequency?	1 / 20 samples or contract/program specific	Yes		Yes		If no: affected sample must be reanalyzed including the LCS.
14. Was the LCS recovery acceptable?	Within in-house or contract/program specific limits	Yes		Yes		If no: affected sample should be reanalyzed with acceeptable LCS recoveries if possible. Detects reported with an LCS failure must be qualified with a "Q" flag. Nondetected analytes reported with a low LCS recovery must also be qualified with a "Q" flag.
15. Was the LCS used before the indicated expiration date?	---	Yes		Yes		If no: samples should be reanalyed with non expired standards.
16. Were the MS and MSD (when required) prepared at the required frequency?	1per 20 samples per matrix or contract/program specific	Yes		Yes		If no: analyze a MS and MSD (if needed) to be included with the sample data.
17. Were the MS and MSD (when required) recoveries acceptable?	Within In-house or contract/program specific limits		No		No	If no: qualify parent sample results with an "M" flag if recoveries were low. If recoveries were high then qualify any affected detects in the parent sample.
18. Was the RPD between the MS and MSD (when required) acceptable?	Within in house or contract/program specific limits	Yes		Yes		If no: qualify the parent sample result with a "Y" flag.
19. Was a sample duplicate prepared at the required frequency?	Contract/program specific or 1 per 20 samples (1 / 10 for SDWA samples)	Yes		Yes		If no: analyze one of the sample from the batch as a duplicate.
20. Was the duplicate within precision limits?	Within in-house or contract/program specific limits		No		No	If no: qualify the parent sample result with a "Y" flag.
21. Were all chromatograms checked to ensure accurate peak identification?	---	Yes		Yes		If no: review the IC data to ensure proper retention times and peak identification.
22. Are all samples on the job lists accounted for?	---	Yes		Yes		If no: include and analzye missing sample with another batch.
23. Were non-matrix related nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If no: Enter nonconformities into the NCR spreadsheet before data review/validation..

Standard Log #:	IC0621	Standard:	IC Calibration Mid Level Cl & SO4
Analyst:	JJF	Concentrations:	10mg/L - SO_4, Cl
Prep Date:	04/21/2016	Expiration Date (48 hours):	04/23/2016
Prep:	Into a 100 mL volumetric flask, pipetted 1.0 mL of each Sulfate (1000mg/L) CCV Stock Std. (1), and Chloride (1000mg/L) CCV Stock Std. (2) and brought to volume with Milli-Q water. (1) IC0606 (2) IC0576		

Standard Log #:	IC0622	Standard:	IC CCV Mid Level
Analyst:	JJF	Concentrations:	3.0 mg/L - Cl 5.0 mg/L - SO_4
Prep Date:	04/21/2016	Expiration Date (1 Month):	05/21/2016
Prep:	Into a 100 mL volumetric flask, pipetted 0.30 mL of 1,000 mg/L Chloride CCV Stock Std. (1) and 0.50 mL of 1,000 mg/L Sulfate CCV Stock Std. (2) and brought to volume with Milli-Q DI H20. (1) IC0576 (2) IC0606		

Standard Log #:	IC0623	Standard:	IC Mid Level LCS
Analyst:	JJF	Concentrations:	0.70 mg/L F, NO_2, Br, NO_3, $P0_4$, 3.0 mg/L Cl, 5.0 mg/L SO_4
Prep Date:	04/21/2016	Expiration Date (48 hours):	05/21/2016
Prep:	Into a 100 ml volumetric flask pipette 10ml Mixed LCS (7mg/L F, NO_3, PO_4, Br & 50 mg/L SO_4 & 30 mg/L Cl) IC608 and 10 mL Nitrite LCS (7 mg/L NO_2) IC609 and dilute to		

Standard Log #:	IC0624	Standard:	IC LOD-LOQ2
Analyst:	JJF	Concentrations:	
Prep Date:	04/21/2016	Expiration Date (48 hours):	04/23/2016

Prep:

LOD Check:
Into a 100mL Volumetric flask pipetted the following, then brought to volume with Milli-Q DI water.

Fluoride	0.010	mL	IC0395	Nitrate	0.015	mL	IC0403
Chloride	0.200	mL	IC0576	Phosphate	0.025	mL	IC0486
Nitrite	0.020	mL	IC0396	Sulfate	0.250	mL	IC0606
Bromide	0.020	mL	IC0597				

LOQ Check:
Into a 100mL Volumetric flask pipetted the following, then brought to volume with Milli-Q DI water.

Fluoride	0.030	mL	IC0395	Nitrate	0.040	mL	IC0403
Chloride	0.400	mL	IC0576	Phosphate	0.050	mL	IC0486
Nitrite	0.040	mL	IC0396	Sulfate	0.500	mL	IC0606
Bromide	0.050	mL	IC0597

COD Data Validation Checklist

LIMS #: 125013	Method: Chemical Oxygen Demand EPA 410.4			
Analysis Date	Analyst / Data Interpreter	Independent Reviewer	Date of Review	Approved
4/19/16	MER	[illegible]	4/25/16	(Yes) ... No

Instructions: Complete one checklist per *analytical run*. Enter the appropriate response for each question. Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	Acceptance Criteria	Analyst Review		Independent Review		Comments: (indicate reference to an attachment if necessary)
		Yes	No	Yes	No	
1. Does a digestion sheet accompany the data package?	---	X		X		
2. Does the digestion sheet include all reagent and standard prep log numbers?	---	X		X		
3. Was a Method Blank prepared at the required frequency?	1per 20 samples or at contract/program specific frequencies	X		X		
4. Was the method blank within acceptance criteria?	< RL or client/project specific	X		X		
5. Was an LCS prepared at the required frequency?	1per 20 samples or at contract/program specific frequencies	X		X		
6. Was the LCS used before the indicated expiration date?	---	X		X		
7. Did the LCS meet the acceptance criteria?	Within in-house or client/project specific limits	X		X		
8. Was an MS and MSD prepared at the required frequency?	1per 10 per batch or at contract/program specific frequencies	X		X		
9. Did the MS/MSD's meet the acceptance criteria?	Within in-house or contract/program specific limits	X		X		
10. Did the MS/MSD's meet the RPD criteria?	Within in-house or contract/program specific limits	X		X		
11. Was a Duplicate prepared at the required frequency?	1per 10 per batch or at contract/program specific frequencies	X		X		
12. Did the Duplicate meet the RPD criteria?	Within in-house or contract/program specific limits	X		X		
13. Were the samples digested within hold time?	28 days	X		X		
14. Are all samples on the job lists accounted for?	---	X		X

FWC39-01 Data Review Checklist

		Method: Total Organic Carbon Method 415.1/9060		Independent Data Review Checklist		
LIMS Run #(s)	**Analysis Date**	**Interpreter**		**Independent Reviewer**	**Date of Review**	**Approved? (Yes or No)**
124879 124880 124881	04/14/2016	JJF		RLD	04/19/2016	Yes

Instructions: Complete one checklist per *analytical sequence* . Enter the appropriate response for each question.
Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

		Analyst Review		**Independent Review**		**Comments:**
		Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were the samples preserved prior to analysis and analyzed within hold time?	pH <2, 28 days or program/project specific	Yes		Yes		If No: Qualify data analyzed after hold time (H).
2. Was the calibration curve performed using the required number of standards?	3 standards and a blank	Yes		Yes		If No: Recalibrate using required number of standards.
3. Was the correlation coefficient acceptable?	r ≥ .995	Yes		Yes		If No: Recalibrate.
4. Were the ICV and ICB analyzed?	---	Yes		Yes		If No: Analyze ICV and ICB prior to any sample analyses.
5. Was the ICV result acceptable?	90 – 110 % Rec. or contract/program specific	Yes		Yes		If No: Reanalyze, if NO after second analysis, address problem and recalibrate.
6. Was the ICB result acceptable?	< LOD or contract/program specific	Yes		Yes		If No: address possible contamination and reanalyze.
7. Was an LCS & MB run with each batch of samples?	One each per analytical batch or contract/program specific frequency.	Yes		Yes		If No: Reanalyze affected samples with appropriate QC.
8. Was the LCS recovery acceptable?	In-house derived or contract/program specific limits.	Yes		Yes		If No: Reanalyze affected samples with an acceptable LCS when possible, otherwise qualify affected samples (Q).
9. Were the MB results acceptable?	< LOD or project/ program specific (<1/2 RL for DOD-QSM).	Yes		Yes		If No: Reanalyze affected samples with acceptable MB when possible, otherwise qualify affected samples (B).
10. Were the CCV's analyzed at the required frequency?	Beginning, after every 10 sample, & at the end of a sequence.	Yes		Yes		If No: Reanalyze affected samples with appropriate CCV intervals.
11. Were the CCB's analyzed at the required frequency?	After each CCV (unless MB analyzed after CCV)	Yes		Yes		If No: Reanalyze affected samples with appropriate CCB intervals.
12. Were the CCV recoveries acceptable?	90 – 110 % Rec. or project/ program specific	Yes		Yes		If No: Reanalyze affected samples.
13. Were the CCB results acceptable?	< LOD or project/ program specific	Yes		Yes		If No: Reanalyze affected samples with acceptable CCB when possible, otherwise qualify affected samples (B).

14. Were all positive results that were reported within the calibration curve?	---	Yes		Yes		If No: Dilute sample and reanalyze.
15. Was an MS and MSD analyzed at the required frequency?	1 / 20 of the same matrix or project/ program specific	Yes		Yes		If No: Prepare and analyze the matrix spikes.
16. Were the MS and MSD recoveries acceptable?	In-house derived or project/ program specific limits	Yes		Yes		If No: Qualify the affected parent sample result (M).
17. Was the RPD between the MS and MSD acceptable?	In-house derived or project/ program specific limits	Yes		Yes		If No: Qualify the affected parent sample result (Y).
18. Was a Duplicate analyzed at the required frequency?	1 per 20 of the same matrix or contract/program specific	Yes		Yes		If No: Analyze the duplicate for appropriate sample.
19. Was the RPD between the Duplicate (if valid) and the sample acceptable?	In-house derived or project/ program specific limits (QSM samples, duplicate only valid when sample result ≥5x the LOQ)		No		No	If No: Qualify the affected parent sample result (Y). Invalid = no qualifier.
20. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: Analyze samples that were missed.
21. Is the standards prep log numbers noted on the analytical report?	---	Yes		Yes		If No: Document the standards used for calibration and analysis.
22. Were post analysis corrections addressed and/or the Audit Trail function turned on (if available)?	Correction should be initialed, dated, and reason given. Audit trail must be on (if available)	Yes		Yes		If No: Initial, date, and state reason for any changes or corrections.
23. Were non-matrix related nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If No: Enter nonconformity information into the NCR spreadsheet before data review/validation.

CT Laboratories Terms and Conditions

Where a purchaser (Client) placed an order for laboratory consulting or sampling services from CT Laboratories (CTL), CTL shall provide the ordered services pursuant to these Terms and Conditions, and the related Quotation, or as agreed in a negotiated contract. In the absence of a written agreement to the contrary, the Order constitutes an acceptance by the Client of CTL's offer to do business under these Terms and Conditions, and an agreement to be bound by these Terms and Conditions. No contrary or additional terms and conditions expressed on a Client's document shall be deemed to become a part of the contract created upon acceptance of these Terms and Conditions, unless accepted by CTL in advance of the start of the project and in writing.

1. ORDERS AND RECEIPT OF SAMPLES (Sample Acceptance Policy)

1.1 The Client may place the Order (i.e., specify a Scope of Work) either by submitting a purchase order to CTL in writing, by telephone (confirmed in writing) or by negotiated contract. Whichever option the Client selects for placing the Order, the Order shall not be valid unless it contains sufficient specification to enable CTL to carry out the Client's requirements. It is the policy of CT Laboratories that samples not meeting the acceptance criteria, outlined in the NELAC standards and Section 5.8.3.2 of the DOD QSM, will not be accepted by the laboratory or will be qualified on the final report. All samples submitted to the laboratory must: (1) be accompanied by proper, full and complete documentation, including sample identification, location, date and time of collection, the collector's name, type of preservation (if any), type of sample, any special comments concerning the sample and other additional pertinent fields on the chain-of-custody. In the absence of any of the required information, the laboratory will attempt to contact the client to obtain the information; if unable to obtain the necessary information, the final report will be qualified. (2) be labeled appropriately with a unique sample identification written with indelible ink on water resistant labels. If the laboratory cannot determine the identity of a sample, it will be rejected and the client will be contacted for further instructions or resampling. (3) be in an appropriate sample container. If the container is inappropriate, the client will be contacted for further instructions or resampling. If analysis is possible, the final report will be qualified. CT Laboratories can provide a sampling guide containing approved containers and preservations for analytical methods requested. (4) adhere to specified holding times. If samples are received with less than ½ the holding time remaining for the requested test, CT Laboratories will make its best effort to analyze the samples and notify the client. If holding times are exceeded, the final report will be qualified. (5) contain adequate sample volume to perform the necessary testing. If sufficient volume is not present, the sample will be rejected and the client will be contacted for further instructions or resampling. If samples show signs of damage, contamination or inadequate preservation, the client will be notified. If analysis can be performed, the final report will be qualified. If not, the samples will be rejected and the client notified for further instructions or resampling.

1.2 CT Laboratories must be supplied with complete written disclosure of the known or suspected presence of any hazardous substances, as defined by applicable federal or state law. Where any samples which were not accompanied by the required disclosure, cause interruptions in the lab's ability to process work due to contamination of instruments or work areas, the Client will be responsible for the costs of clean up and recovery.

1.3 Prior to Sample Acceptance, the entire risk of loss or damage to samples remains with the Client. In no event will CTL have any responsibility or liability for the action or inaction of any carrier shipping or delivering any sample to or from CTL's premises. Client is responsible to assure that any sample containing any hazardous substance which is to be delivered to CTL's premises will be packaged, labeled, transported and delivered properly and in accordance with applicable laws.

2. PAYMENT TERMS

2.1 Services performed by CTL will be in accordance with prices quoted and later confirmed in writing or as stated in the Price Schedule. Invoices may be submitted to Client upon completion of any sample delivery group. Payment in advance is required for all Clients except those whose credit has been established with CTL. For Clients with approved credit, payment terms are net 30 days from the date of invoice by CTL. All overdue payments are subject to an additional interest and service charge of one and one-half percent (1.5%) (or the maximum rate permissible by law, whichever is lesser) per month or portion thereof from the due date until the date of payment. All fees are charged or billed directly to the Client. The billing of a third party will not be accepted without a statement, signed by the third party that acknowledges and accepts payment responsibility. CTL may suspend work and withhold delivery of data under this order at any time in the event Client fails to make timely payment of its invoices. Client shall be responsible for all costs and expenses of collection including reasonable attorney's fees. CTL reserves the right to refuse to proceed with work at any time based upon an unfavorable Client credit report.

3. CHANGE ORDERS, TERMINATION

3.1 Changes to the Scope of Work, price, or result delivery date may be initiated by CTL after Sample Acceptance due to any condition which conflicts with analytical, QA or other protocols warranted in these Terms and Conditions. CTL will not proceed with such changes until an agreement with the Client is reached on the amount of any cost, schedule change or technical change to the Scope of Work, and such agreement is documented in writing.

3.2 Changes to the Scope of Work, including but not limited to increasing or decreasing the work, changing test and analyses specification or acceleration in the performance of the work may be initiated by the Client after sample acceptance. Such a change will be documented in writing and may result in a change in cost and turnaround time commitment. CTL's acceptance of such changes is contingent upon technical feasibility and operational capacity.

3.3 Suspension or termination of all or any part of the work may be initiated by the Client. CTL will be compensated consistent with Section 2 of these Terms and Conditions. CTL will complete all work in progress and be paid in full for all work completed.

4. WARRANTIES AND LIABILITY

4.1 Where applicable, CTL will use analytical methodologies which are in substantial conformity with published test methods. CTL has implemented these methods in its Laboratory Quality Manuals and referenced Standard Operating Procedures and where the nature or composition of the sample requires it, CTL reserves the right to deviate from these methodologies as necessary or appropriate, based on the reasonable judgment of CTL, which deviations, if any, will be made on a basis consistent with recognized standards of the industry and/or CTL's Laboratory Quality Manuals. Client may request that CTL perform according to a mutually agreed Quality Assurance Project Plan (QAPP). In the event that samples arrive prior to agreement on a QAPP, CTL will proceed with analyses under its standard Quality Manuals then in effect, and CTL will not be responsible for any resampling or other charges if work must be repeated to comply with a subsequently finalized QAPP.

4.2 CTL shall start preparation and/or analysis within holding times provided that Sample Acceptance occurs within 48 hours of sampling or 1/2 of the holding time for the test, whichever is less. Where resolution of inconsistencies leading to Sample Acceptance does not occur within this period, CTL will use its best efforts to meet holding times and will proceed with the work provided that, in CTL's judgment, the chain-of-custody or definition of the Scope of Work provide sufficient guidance. Reanalysis of samples to comply with CTL's Quality Manuals will be deemed to have met holding times provided the initial analysis was performed within the applicable holding time. Where reanalysis demonstrates that sample matrix interference is the cause of failure to meet any Quality Manual requirements, the warranty will be deemed to have been met.

4.3 CTL warrants that it possesses and maintains all licenses and certifications which are required to perform services under these Terms and Conditions provided that such requirements are specified in writing to CTL prior to Sample Acceptance. CTL will notify the Client in writing of any decertification or revocation of any license, or notice of either, which affects work in progress.

4.4 The warranty obligations set forth in Sections 4.1, 4.2 and 4.3 are the sole and exclusive warranties given by CTL in connection with any services performed by CTL or any Results generated from such services, and CTL gives and makes NO OTHER REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. No representative of CTL is authorized to give or make any other representation or warranty or modify this warranty in any way.

4.5 Client's sole and exclusive remedy for the breach of warranty in connection with any services performed by CTL will be limited to repeating any services performed, contingent on the Client providing, at the request of CTL and at the Client's expense, additional sample(s) if necessary. Any reanalysis requested by the Client generating Results consistent with the original Results will be at the Client's expense. If resampling is necessary, CTL's liability for resampling costs will be limited to actual cost or one hundred or one hundred fifty dollars ($150) per sample, whichever is less.

4.6 CTL's liability for any and all causes of action arising hereunder, whether based in contract, tort, warranty, negligence or otherwise, shall be limited to the lesser amount of compensation for the services performed or $100,000. All claims, including those for negligence, shall be deemed waived unless suit thereon is filed within one year after CTL's completion of the services. Under no circumstances, whether arising in contract, tort (including negligence), or otherwise, shall CTL be responsible for loss of use, loss of profits or for any special, indirect, incidental or consequential damages occasioned by the services performed or by application or use of the reports prepared.

4.7 In no event shall CTL have any responsibility or liability to the Client for any failure or delay in performance by CTL which results, directly or indirectly, in whole or in part, from any cause or circumstance beyond the reasonable control of CTL. Such causes and circumstances shall include, but not be limited to, acts of God, acts of Client, acts or orders of any governmental authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, equipment breakdown, matrix interference or unknown highly contaminated samples that impact instrument operation, unavailability of supplies from usual suppliers, difficulties or delays in transportation, mail or delivery services, or any other cause beyond CTL's reasonable control.

5. RESULTS, WORK PRODUCT

5.1 Data or information provided to CTL or generated by services performed under this agreement shall only become the property of the Client upon receipt in full by CTL of payment for the whole Order. Ownership of any analytical method, QA/QC protocols, software programs or equipment developed by CTL for performance of work will be retained by CTL, and Client shall not disclose such information to any third party.

5.2 Data and sample materials provided by Client or at Client's request, and the result obtained by CTL shall be held in confidence (unless such information is generally available to the public or is in the public domain or Client has failed to pay CTL for all services rendered or is otherwise in breach of these Terms and Conditions), subject to any disclosure required by law or legal process.

5.3 Should the Results delivered by CTL be used by the Client or Client's client, even though subsequently determined not to meet the warranties described in these Terms and Conditions, then the compensation will be adjusted based upon mutual agreement. In no case shall the Client unreasonably withhold CTL's right to independently defend its data.

5.4 CTL reserves the right to subcontract services ordered by the Client to another laboratory or laboratories, if, in CTL's sole judgment, it is reasonably necessary, appropriate or advisable to do so, and with the Client's permission. CTL will in no way be liable for any subcontracted services and all applicable warranties, guarantees and insurance are those of the subcontracted laboratory.

5.5 CTL shall dispose of the Client's samples 30 days after the analytical report is issued, unless instructed to store them for an alternate period of time or to return such samples to the Client, in a manner consistent with U.S. Environmental Protection Agency regulations or other applicable Federal, state or local requirements. Any samples for projects that are canceled or not accepted, or for which return was requested, will be returned to the Client at their own expense. CTL reserves the right to return to the Client any sample or unused portion of a sample that is not within CTL's permitted capability or the capabilities of CTL's designated waste disposal vendor(s).

5.6 Unless a different time period is agreed to in any order under these Terms and Conditions, CTL agrees to retain all records for five (5) years.

5.7 In the event that CTL is required to respond to legal process related to services for Client, Client agrees to reimburse CTL for hourly charges for personnel involved in the response and attorney fees reasonably incurred in obtaining advice concerning the response, preparation to testify, and appearances related to the legal process, travel and all reasonable expenses associated with the litigation.

6. INSURANCE

6.1 CTL shall maintain in force during the performance of services under these Terms and Conditions, Workers' Compensation and Employer's Liability insurance in accordance with the laws of the states having jurisdiction over CTL's employees who are engaged in the performance of the work. CTL shall also maintain during such period, Comprehensive General and Contractual Liability (limit of $2,000,000 per occurrence/ aggregate), Comprehensive Automobile Liability, owned and hired, ($1,000,000 combined single limit), and Professional/Pollution Liability Insurance (limit of $5,000,000 per occurrence/aggregate). Any Client required changes to these limits or conditions may result in a change in cost to the Client.

7. AUDIT

7.1 Upon prior notice to CTL, the Client may audit and inspect CTL's records and accounts covering reimbursable costs related to work done for the Client, for a period of one (1) year after completion of the work. The purpose of any such audit shall be only for verification of such costs, and CTL shall not be required to provide access to cost records where prices are expressed as fixed fees or published unit prices.

CT Laboratories Terms and Conditions

Where supurchaser (Client) places an order for laboratory, consulting or sampling services from CT Laboratories (CTL), CTL shall provide the ordered services pursuant to these Terms and Conditions, and the related Quotation, or as agreed in a negotiated contract. In the absence of a written agreement to the contrary, the Order constitutes an acceptance by the Client of CTL's offer to do business under these Terms and Conditions, and an agreement to be bound by these Terms and Conditions. No contrary or additional terms and conditions expressed in a Client's document shall be deemed to become a part of the contract created upon acceptance of these Terms and Conditions, unless accepted by CTL in advance of the start of the project and in writing.

1. ORDERS AND RECEIPT OF SAMPLES (Sample Acceptance Policy)

1.1 The Client may place the Order (i.e., specify a Scope of Work) either by submitting a purchase order to CTL in writing, by telephone (confirmed in writing) or by negotiated contract. Whichever option the Client selects for placing the Order, the Order shall not be valid unless it contains sufficient specification to enable CTL to carry out the Client's requirements. It is the policy of CT Laboratories that samples not meeting the acceptance criteria, outlined in the IHELAC standards and Section 5.8.3.2 of the DOD QSM, will not be accepted by the laboratory or will be qualified on the final report. All samples submitted to the laboratory must: (1) be accompanied by proper, full and complete documentation, including sample identification, location, date and time of collection, the collector's name, type of preservation (if any), type of sample, any special comments concerning the sample and any additional pertinent details on the chain-of-custody. In the absence of any of the required information, the laboratory will attempt to contact the client to obtain the information, if unable to obtain the necessary information, the final report will be qualified. (2) be labeled appropriately with a unique sample identification written with indelible ink on water resistant labels. If the laboratory cannot determine the identity of a sample, it will be rejected and the client will be contacted for further instructions or resampling. (3) be in an appropriate sample container. If the container is inappropriate, the client will be contacted for further instructions or resampling. If analysis is possible, the final report will be qualified. CT Laboratories can provide a sampling guide containing approved containers and preservations for analytical methods requested. (4) adhere to specified holding times. If samples are received with less than ½ the holding time remaining for the requested test, CT Laboratories will make its best effort to analyze the samples and notify the client. If holding times are exceeded, the final report will be qualified. (5) contain adequate sample volume to perform the necessary testing. If sufficient volume is not present, the sample will be rejected and the client will be contacted for further instructions or resampling. If samples show signs of damage, contamination or inadequate preservation, the client will be notified. If analysis carries performed, the final report will be qualified. If not, the samples will be rejected and the client contacted for further instructions or resampling.

1.2 CT Laboratories must be supplied with complete written disclosure of the known or suspected presence of any hazardous substances, as defined by applicable federal or state law. Where any samples which were not accompanied by the required disclosure, cause disruptions in the lab's ability to process work due to contamination of instruments or work areas, the Client will be responsible for the costs of clean up and recovery.

1.3 Prior to Sample Acceptance, the entire risk of loss or damage to samples remains with the Client. In no event will CTL have any responsibility or liability for the action or inaction of any carrier shipping or delivering any sample to or from CTL's premises. Client is responsible to assure that any sample containing any hazardous substance which is to be delivered to CTL's premises will be packaged, labelled, transported and delivered properly and in accordance with applicable laws.

2. PAYMENT TERMS

2.1 Services performed by CTL will be in accordance with prices quoted and later confirmed in writing or as stated in the Price Schedule. Invoices may be submitted to Client upon completion of any sample delivery group. Payment in advance is required for all Clients except those whose credit has been established with CTL. For Clients with approved credit, payment terms are net 30 days from the date of invoice by CTL. All overdue payments are subject to an additional interest and service charge of one and one-half percent (1.5%) (or the maximum rate permissible by law, whichever is lesser) per month or portion thereof from the due date until the date of payment. All fees are charged or billed directly to the Client. The billing of a third party will not be accepted without a statement, signed by the third party that acknowledges and accepts payment responsibility. CTL may suspend work and withhold delivery of data under this order at any time in the event Client fails to make timely payment of its invoices. Client shall be responsible for all costs and expenses of collection including reasonable attorney's fees. CTL reserves the right to refuse to proceed with work at any time based upon an unfavorable Client credit report.

3. CHANGE ORDERS, TERMINATION

3.1 Changes to the Scope of Work, price, or result/ delivery date may be initiated by CTL after Sample Acceptance due to any condition which conflicts with analytical, QA or other protocols warranted in these Terms and Conditions. CTL will not proceed with such changes until an agreement with the Client is reached on the amount of any cost, schedule change or technical change to the Scope of Work, and such agreement is documented in writing.

3.2 Changes to the Scope of Work, including but not limited to increasing or decreasing the work, changing test and analyses specification or cancellation in the performance of the work may be initiated by the Client after sample acceptance. Such a change will be documented in writing and may result in a change in cost and turnaround time commitment. CTL's acceptance of such changes is contingent upon technical feasibility and operational capability.

3.3 Suspension or termination of all or any part of the work may be initiated by the Client. CTL will be compensated consistent with Section 2 of these Terms and Conditions. CTL will complete its work in progress and be paid in full for all work completed.

4. WARRANTIES AND LIABILITY

4.1 Where applicable, CTL will use analytical methodologies which are in substantial conformity with published test methods. CTL has implemented these methods in its Laboratory Quality Manuals and referenced Standard Operating Procedures and where the nature or composition of the sample requires it, CTL reserves the right to deviate from these methodologies as necessary or appropriate, based on the reasonable judgment of CTL, which deviations, if any, will be made on a basis consistent with recognized standards of the industry and/or CTL's Laboratory Quality Manuals. Client may request that CTL perform according to a mutually agreed Quality Assurance Project Plan (QAPP). In the event that samples arrive prior to agreement on a QAPP, CTL will proceed with analysis under its standard Quality Manuals then in effect, and CTL will not be responsible for any resampling or other charges if work must be repeated to comply with a subsequently finalized QAPP.

4.2 CTL shall start preparation and/or analysis within holding times provided that Sample Acceptance occurs within 48 hours of sampling or 1/2 of the holding time for the test, whichever is less. Where resolution of inconsistences leading to Sample Acceptance does not occur within this period, CTL will use its best efforts to meet holding times and will proceed with the work, provided that, in CTL's judgment, the chain-of-custody or definition of the Scope of Work provide sufficient guidance. Reanalysis of samples to comply with CTL's Quality Manuals will be deemed to have met holding times provided the initial analysis was performed within the applicable holding time. Where reanalysis demonstrates that sample matrix interference is the cause of failure to meet any Quality Manual requirements, the warranty will be deemed to have been met.

4.3 CTL warrants that it possesses and maintains all licenses and certifications which are required to perform services under these Terms and Conditions provided that such requirements are specified in writing to CTL prior to Sample Acceptance. CTL will notify the Client in writing of any decertification or revocation of any license, or notice of either, which affects work in progress.

4.4 The warranty obligations set forth in Sections 4.1, 4.2 and 4.3 are the sole and exclusive warranties given by CTL in connection with any services performed by CTL or any Results generated from such services and CTL gives and makes NO OTHER REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. No representative of CTL is authorized to give or make any other representations or warranty or modify this warranty in any way.

4.5 Client's sole and exclusive remedy for the breach of warranty in connection with any services performed by CTL, will be limited to repeating any services performed, contingent on the Client's providing, at the request of CTL and at the Client's expense, additional sample(s) if necessary. Any reanalysis requested by the Client generating Results consistent with the original Results will be at the Client's expense. If resampling is necessary, CTL's liability for resampling costs will be limited to actual cost or one hundred or one hundred fifty dollars ($150) per sample, whichever is less.

4.6 CTL's liability for any and all causes of action arising hereunder, whether based in contract, tort, warranty, negligence or otherwise, shall be limited to the lesser amount of compensation for the services performed or $100.00). All claims, including those for negligence, shall be deemed waived unless such thereon is filed within one year after CTL's completion of the services. Under no circumstances, whether arising in contract, tort (including negligence), or otherwise, shall CTL be responsible for loss of profits or savings, or for any special, indirect, incidental or consequential damages occasioned by the services performed or by application or use of the reports prepared.

4.7 In no event shall CTL have any responsibility or liability to the Client for any failure or delay in performance by CTL which results directly or indirectly, in whole or in part, from any causes or circumstances beyond the reasonable control of CTL. Such causes and circumstances shall include, but not be limited to, acts of God, acts of Client, acts or orders of any governmental authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, equipment breakdown, material interference or unknown highly contaminated samples that impact/instrument operation, unavailability of supplies from usual suppliers, difficulties or delays in transportation, mail or delivery services, or any other cause beyond CTL's reasonable control.

5. RESULTS, WORK PRODUCT

5.1 Data or information provided to CTL or generated by services performed under this agreement shall only become the property of the Client upon receipt in full by CTL of payment for the whole Order. Ownership of any analytical method, QA/QC protocols, software programs or equipment developed by CTL for performance of work will be retained by CTL, and Client shall not disclose such information to any third party.

5.2 Data and sample materials provided by Client or at Client's request, and the result obtained by CTL shall be held in confidence (unless such information is generally available to the public or is in the public domain or Client has failed to pay CTL for all services rendered or is otherwise in breach of these Terms and Conditions), subject to any disclosure required by law or legal process.

5.3 Should the Results delivered by CTL be used by the Client or Client's client, even though subsequently determined not to meet the warranties described in these Terms and Conditions, then the compensation will be adjusted based upon mutual agreement. In no case shall the Client unreasonably withhold CTL's right to independently defend its data.

5.4 CTL reserves the right to subcontract services ordered by the Client to another laboratory or laboratories, if, in CTL's sole judgment, it is reasonably necessary, appropriate or advisable to do so, and with the Client's permission. CTL will in no way be liable for any subcontracted services and all applicable warranties, guarantees and insurance are those of the subcontracted laboratory.

5.5 CTL shall dispose of the Client's samples 30 days after the analytical report is issued, unless instructed to store them for an alternate period of time or to return such samples to the Client, in a manner consistent with U.S. Environmental Protection Agency regulations or other applicable Federal, state or local requirements. Any samples for projects that are canceled or not accepted, or for which return was requested, will be returned to the Client at their own expense. CTL reserves the right to return to the Client any sample or unused portion of a sample that is not within CTL's permitted capability or the capabilities of CTL's designated waste disposal vendor(s).

5.6 Unless a different time period is agreed to in any order under these Terms and Conditions, CTL agrees to retain all records for five (5) years.

5.7 In the event that CTL is required to respond to legal process related to services for Client, Client agrees to reimburse CTL for hourly charges for personnel involved in the response and attorney fees reasonably incurred in obtaining advice concerning the response, preparation to testify, and appearances related to the legal process, travel and all reasonable expenses associated with the litigation.

6. INSURANCE

6.1 CTL shall maintain in force during the performance of services under these Terms and Conditions, Workers' Compensation and Employer's Liability insurance in accordance with the laws of the states having jurisdiction over CTL's employees who are engaged in the performance of the work. CTL shall also maintain during such period, Comprehensive General and Contractual Liability (limit of $2,000,000 per occurrence/ aggregate), Comprehensive Automobile Liability, owned and hired, ($1,000,000 combined single limit), and Professional/Pollution Liability Insurance (limit of $5,000,000 per occurrence/aggregate). Any Client required changes to these limits or conditions may result in a change in cost to the Client.

7. AUDIT

7.1 Upon prior notice to CTL, the Client may audit and inspect CTL's records and accounts covering reimbursable costs related to work done for the Client, for a period of one (1) year after completion of the work. The purpose of any such audit shall be only for verification of such costs, and CTL shall not be required to provide access to cost records where prices are expressed as fixed fees or published unit prices.

PREPARED:	May 12, 2016
DOCUMENT PAGES:	1222

The data contained in the following report have been reviewed by the appropriate CT Laboratories' LLC staff members. In addition, CT Laboratories LLC certifies that to the best of our knowledge that the analyses reported herein are true, complete and correct within the limits of the methods employed and that they follow the applicable requirements as specified by the project plan, state-specific, NELAC or DOD QSM requirements. The estimated uncertainty of measurement is only available upon request. The reported results relate only to the tested samples. This report shall not be reproduced, except in full, without written approval of CT Laboratories LLC.

Case Narrative

Client: Bering Sea Environmental
Project: RAAP, Radford, VA
Sample Receipt Date(s): 04/15/2016
SDG #: 118319

Seven water samples were received for a variety of analyses, including: explosives, metals, TOC/TIC, anions, COD, pH, chlorate/chlorite, and perchlorate. The chlorite/chlorate analyses were sub-contracted to Europhins Eaton Analytical, South Bend, IN. The perchlorate and RDX breakdown products (MDX/DNX/TNX) analyses were sub-contracted to SGS Accutest-Southeast, Orlando, FL. The assigned sample ID number, date sampled, and date received are indicated in the attached Project Summary. The samples were received intact and at a temperature within method specified acceptance limits. A breakdown of sample receipt information can be found on the Sample Condition Report located in the last section of the data package and any exceptions are noted below. The analyses were performed following DOD QSM 5.

Manual integrations may have been performed on the data provided with this package. If manual integrations were performed, a Reason #(s) was included on the raw data that corresponds to the "Index Key for Manual Integration Rationale." The raw data includes a "Before" and "After" manual integration illustration. The manual integrations were initialed and dated by the analyst, as well as, by the person reviewing the data.

Sample Analysis and Quality Control

Explosives Analysis:

The samples were analyzed using US EPA Method 8330B (explosives). All samples were analyzed within the holding time. The following summaries of quality control procedures are included:

Surrogate Recovery Data
Matrix Spike/Matrix Spike Duplicate Recovery Data
Laboratory Control Spike Data
Method Blank Data
Initial Calibration Summary
Calibration Check Summary
Analysis Run Log
Prep Log
Chromatograms

All analysis results met the method specified quality control criteria with the following exceptions:

Explosives (8330B) Water Analysis

Analytical Run # 125220

On the primary analysis, surrogate recoveries were high in the Method Blank (MB) and samples 709257, 709260, and 709272 but the confirmation analysis of each of these had surrogate recoveries within acceptable QC limits. This could be due to some type of contaminant co-elution on the primary analysis that does not occur on the confirmation analysis. The surrogate values were reported from the primary analysis and the sample surrogate value was qualified with an "S" flag.

Sample 709222, its Matrix Spike (MS), and Matrix spike Duplicate (MSD) had low surrogate recovery on the primary analysis due to a large neighboring peak interfering with surrogate quantitation. The confirmation analysis result was within the acceptable QC range for the parent sample. The primary result was reported and qualified with an "S" flag.

Samples 709274 and 709276 had high surrogate recoveries on both the primary and confirmation analyses. The primary results were reported and qualified with an "S" flag.

Metals Analysis:

The samples were analyzed using US EPA Methods 6010C (ICP) and 7470A (Hg). All samples were analyzed within the holding time. The following summaries of quality control procedures are included:

Initial and Continuing Calibration Verification
Blanks Summary
ICP Interference Check Data
Spike Sample Recovery
Duplicates Data
Laboratory Control Sample Data
Analysis Run Log

All analysis results met the method specified quality control criteria with the following exceptions:

ICP Metals (6010C) Water Analysis

Continuing Calibration Verification (CCV) standards were analyzed at two levels (CCV1 & CCV2) with potentially differing wavelengths. Data associated with CCV's were evaluated based on the concentration of the element in the samples and compared to the appropriate CCV level/wavelength.

Some samples may have been analyzed and/or reanalyzed diluted to obtain results for all target analytes within the calibration range of the instrument.

<u>Analytical Run # 125061</u>

Copper and silver were detected in the MB greater than the Method Detection Limit (MDL) but less than ½ the Reporting Limit (RL). Affected samples were reported and qualified with a "B" flag when the MB raw results were greater than $1/10^{th}$ of the sample raw results.

Calcium was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and not reanalyzed because the MB result was less than $1/10^{th}$ of the sample results.

The Serial Dilution (L) for sample # 709262 was not applicable for multiple elements because the parent sample raw results were less than 50 times the Limit of Quantitation (LOQ). A Post Digestion Spike (PDS) was analyzed and was unacceptable for barium. The parent sample was reported and qualified with an "M" flag for barium.

The L for sample # 709262 was not acceptable for calcium and magnesium because the results exceeded the Relative Percent Difference (RPD) limit. A PDS was analyzed and was unacceptable for magnesium. The parent sample was reported and qualified with an "M" flag for magnesium.

The Duplicate (DUP) for sample # 709262 was not applicable for multiple elements because the parent sample results were less than five times the LOQ. A MSD was analyzed to demonstrate precision and was acceptable. The parent sample was reported and not qualified.

The MS or MSD for sample # 709262 exceeded the recovery limit for barium, cadmium, and iron. A PDS was analyzed and was unacceptable for barium. The parent sample was reported and qualified with an "M" flag for barium.

ICP Sodium and Potassium (6010C) Water Analysis

Analytical Run # 125062

The L for sample # 709262 was not applicable for sodium and potassium because the parent sample raw results were less than 50 times the LOQ. A PDS was analyzed and was acceptable. The parent sample was reported and not qualified.

The DUP for sample # 709262 was not applicable for potassium because the parent sample result was less than five times the LOQ. An MSD was not analyzed because there was an insufficient volume of sample.

CVAA Mercury (7470A) Water Analysis

Analytical Run # 124999

The DUP for sample # 709262 was not applicable for mercury because the parent sample result was less than five times the LOQ. An MSD was analyzed to demonstrate precision and was acceptable. The parent sample was reported and not qualified.

Inorganic Analysis:

The samples were analyzed using US EPA Methods 9060A (TOC & TIC), 9040C (pH), 410.4 (COD) and 9056A (anions). All samples were analyzed within the holding time. The following summaries of quality control procedures are included:

Duplicate Analysis Data
Laboratory Control Spike Data
Method Blank Data
Initial Calibration Summary
Calibration Check Summary
Analysis Run Log
Prep Log

All analysis results met the method specified quality control criteria with the following exceptions:

Some samples may have been analyzed and/or reanalyzed diluted to obtain results for all target analytes within the calibration range of the instrument.

Anions (9056A) Water Analysis

Analytical Run # 124941

The MS for sample # 709223 had a low recovery for sulfate. The parent sample result for this analyte was qualified with and "M" flag.

Chemical Oxygen Demand (COD) (410.4) Analysis

Analytical Run # 125013

The sample DUP, MS, and MSD were analyzed on a sample from a different SDG. All analysis results for this SDG met the method/project specified quality control criteria.

Filtration Analysis

Analytical Run # 125039

The filtration was completed successfully prior to sample analyses.

pH (9040C) Analysis

Analytical Run # 124948

Sample DUP was analyzed under COC 118280. All analysis results for this SDG met the method/project specified quality control criteria.

Total Inorganic Carbon (TIC) (9060A) Analysis

Analytical Run # 125705

All analysis results for this SDG met the method/project specified quality control criteria.

Total Organic Carbon (TOC) (9060A) Analysis

Analytical Run # 125181

All analysis results for this SDG met the method/project specified quality control criteria.

Data Qualifiers

Code	Description
A	Analyte averaged calibration criteria within acceptable limits.
B	Analyte detected in associated Method Blank.
C	Toxicity present in BOD sample.
D	Diluted Out.
E	Safe, No Total Coliform detected.
F	Unsafe, Total Coliform detected, no E. Coli detected.
G	Unsafe, Total Coliform detected and E. Coli detected.
H	Holding time exceeded.
J	Estimated value.
L	Significant peaks were detected outside the chromatographic window.
M	Matrix spike and/or Matrix Spike Duplicate recovery outside acceptance limits.
N	Insufficient BOD oxygen depletion.
O	Complete BOD oxygen depletion.
P	Concentration of analyte differs more than 40% between primary and confirmation analysis.
Q	Laboratory Control Sample outside acceptance limits.
R	See Narrative at end of report.
S	Surrogate standard recovery outside acceptance limits due to apparent matrix effects.
T	Sample received with improper preservation or temperature.
U	Analyte concentration was not above the detection level.
V	Raised Quantitation or Reporting Limit due to limited sample amount or dilution for matrix background interference.
W	Sample amount received was below program minimum.
X	Analyte exceeded calibration range.
Y	Replicate/Duplicate precision outside acceptance limits.
Z	Calibration criteria exceeded.

CT LABORATORIES

delivering more than data from your environmental analyses

MANUAL INTEGRATION REASON CODES

CTLaboratories has identified four general cases with valid reasons supporting the use of manual integration techniques. These codes are used on chromatograms in this data package to document the reasons for manual integrations per CTLaboratories' SOP SS-10 current revision.

#1: **Data system failed to select the correct peak or missed the peak entirely.**
In some cases the chromatography system selects and integrates the "wrong peak". In this case the analyst must correct the selection and force the system to integrate the proper peak. In other instances the system may miss the peak completely. In this case the analyst manually integrated the peak

#2: **Data System Splits the Peak Incorrectly or Integrates a False Peak as a Rider Peak.**
This phenomenon is common at low concentrations where the signal to noise ratio is low. A single compound (peak) is incorrectly split into multiple peaks or integrated as a main peak with one or more rider peaks resulting in low or high area counts for the target compound.

#3: Improperly Integrated Isomers and/or coeluting compounds.
For when the system fails to distinguish coeluting compounds and or isomers. The integration areas and concentrations may be inaccurate, and they must be corrected by manual integration. Prime examples are compounds that are unresolved and integrated improperly when present at low concentrations in standards or samples.

#4: System Established Incorrect Baseline.
There are numerous situations in chromatography where the system establishes the baseline incorrectly. Some baseline errors will be obvious to the analyst and may be corrected via manual procedures.

#5: Miscellaneous.
Some situations involving integration errors may require in-depth review and technical judgment. These cases should be brought to the attention of the group supervisor. If the form of manual integration is not clearly covered by these four cases, then review and approval by the group supervisor or the *QA/QC* Supervisor will be required.

8330B Analysis Data Review Checklist

Analytical Run #: 125220	**Independent Reviewer: JJY**
Sequence Date: 4/25/2016; 4/26/2016	**Date of Review: 4/27/2016**
Analyst/Data Interpreter: RED	**Approval: yes**

Instructions: Complete one checklist per *analytical run* . Enter the appropriate response for each question. Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirements:	Acceptance Criteria	Analyst Review		Independent Review		Comments (indicate reference to an attachment if necessary)
		Yes	No	Yes	No	
1. INITIAL CALIBRATION (ICAL)						
a. Was the Explosive initial calibration performed using a minimum of five varying standard concentration levels?	Lowest standard at or near MRL	X		X		
b. Is the variation between calibration response factors for all concentration levels <15% RSD, is r^2 >.990, or r > 0.995 for the regression line?		X		X		
c. Was each ICAL uniquely identified (i.e. Standard Number)?	RSD<15%, r^2>0.990, or r>0.995	X		X		
d. Was an initial calibration blank (ICB) analyzed?		X		X		
2. INITIAL CALIBRATION VERIFICATION (ICV)						
a. Was there a second source ICV for all target analytes analyzed after the initial calibration and prior to analysis of any samples?	Second source	X		X		
b. Were the recoveries for the ICV between 85-115% (80-120% for QSM).	% Recovery	X		X		
c. Was the ICV uniquely identified (i.e. Standard Number)?		X		X		
3. CONTINUING CALIBRATION VERIFICATION (CCV)						
a. Were CCVs analyzed at the beginning of the sequence, after every 12 hours or every 20 samples (which ever comes first)(every 10 samples for QSM) and at the end of the analytical run?		X		X		
b. Were the recoveries for the CCVs within program limits?	%Recovery	X		X		
c. Was each CCV uniquely identified (i.e. Standard Number)?		X		X		

Additional Comments:

Table 5

8330B Analysis Data Review Checklist

Requirements:	Acceptance Criteria	Analyst		Independent		Comments (indicate reference to an attachment if necessary)
		Yes	No	Yes	No	
4. BLANKS						
a. Was a method blank (MB) analyzed prior to the analysis of samples?		X		X		
b. Was the MB result less than ½ the reporting limit (RL) or 5% of the sample amount (QSM: less than 1/2 the RL and <10% of the sample amount)?		X		X		
c. Was a MB prepped and analyzed at a frequency of one per Prep Batch?	Batch ≤20 samples	X		X		
5. LABORATORY CONTROL SAMPLE (LCS)						
a. Was a LCS analyzed at a frequency of one per Prep Batch?	Batch ≤20 samples	X		X		
b. Were the LCS recoveries in each LCS within the acceptance criteria?	Per Program	X		X		
6. MATRIX SPIKES						
a. Was a matrix spiked (MS) sample analyzed at a frequency one per Prep Batch?	Batch ≤20 samples	X		X		
b. Were MS recoveries in each MS within the acceptance criteria?	Per Program	X		X		
7. MATRIX SPIKE DUPLICATE						
a. Was a duplicate matrix spike sample analyzed at a frequency one per Prep Batch?	Batch <20 samples	X		X		
b. Were MSD within the acceptance criteria?	Per Program	X		X		
c. Is the relative percent difference (RPD) between a matrix spike (MS) and its duplicate (MSD) within the acceptance criteria?	Per Program QSM: 30% RPD	X		X		

Additional Comments:

Table 5

8330B Analysis Data Review Checklist

Requirements:	Acceptance Criteria	Analyst		Independent		Comments (indicate reference to an attachment if necessary)
		Yes	No	Yes	No	
8. SAMPLES (INCLUDING BLANKS, STANDARDS, AND QC SAMPLES)						
a. Are chromatogram characteristics, including peak shapes and areas, consistent with those of the CCV?		X		X		
b. Are surrogate recoveries for all samples, blanks, standards, and QC samples within acceptance criteria?			X		X	See Below
c. Were all samples having analytes detected in amounts exceeding the calibration range diluted and reanalyzed?		X		X		
d. Were all samples extracted within holding times and analyzed within 40 days of extracting?	Analysis within 40 days of extraction	X		X		
e. Was there a acetonitrile:H2O injection preformed prior to sample analysis?		X		X		
f. If any analytes were detected in the soil grinding blanks, were the associated samples B-flagged?	< 1/2 RL	N/A		N/A		water samples
g. Was the batch soil triplicate RSD within acceptance criteria?	<20%	N/A		N/A		water samples
9. RECORDS AND REPORTING						
a. Are Run, Prep Batch and Extraction sheets, Summary sheets, Sequence file, initial and rerun raw and process data present in the PDF file?		X		X		
b. Are all chromatograms dated and initialed?		X		X		
c. Are reported results whose amounts exceeded the acceptance criteria flagged with an appropriate qualifier and, if needed, a NCR completed?		X		X		
d. Do all values, dilution factors and qualifiers listed on the raw reports match the LIMS data?		X		X		
e. Is the ICAL method referenced on the Raw Data?		X		X		

Additional Comments:

On the primary analysis, surrogate recoveries were high in the method blank and samples 709257, 709260, and 709272 but the confirmation analysis of each of these had surrogate recoveries within acceptable QC limits. This could be due to some type of contaminant co-elution on the primary analysis that does not occur on the confirmation analysis. The surrogate values were reported from the primary analysis and the sample surrogate value was qualified with an "S".

Sample 709222, its matrix spike (MS), and matrix spike duplicate (MSD) had low surrogate recovery on the primary analysis due to a large neighboring peak interfering with surrogate quantitation. The confirmation analysis result was within the acceptable QC range for the parent sample. The primary result was reported and qualified with an "S".

Samples 709274 and 709276 had high surrogate recoveries on both the primary and confirmation analyses. The primary results were reported and qualified with an "S".

INORGANIC ANALYSIS DATA SHEET

Sample Description

54ADW01

Lab Name:	CT Laboratories	Contract:	BERING SEA ENVIRONMENTAL-RADFORD AAP
Matrix (soil/water):	GROUND WATER	SDG No.:	118319
% Solids:		Lab Sample ID:	709262
Analytical Method:	EPA 6010C	Date Received:	04/15/2016
Dilution Factor:	1.00	TCLP/SPLP Extraction Date/time:	
Analytical Run #:	125062	Analysis Date/Time	04/21/2016 12:44
Analytical Prep Batch #:	56829	Prep. Date/Time:	04/19/2016 07:00
ICAL Calibration #:		Concentration Units:	ug/L

CAS #	Analyte	Concentration	Qualifiers	DL	LOD	LOQ	RL
7440-09-7	Total Potassium	1030		90	250	500	500
7440-23-5	Total Sodium	4770		100	300	600	600

INITIAL CALIBRATION VERIFICATION

Lab Name: CT Laboratories Contract: BERING SEA ENVIRONMENTAL-RADFORD AAP

SDG No.: 118319

Analytical Run #: 124999 Lab Sample ID: 710587

ICAL Calibration #: 04192016 Concentration Units: ug/L

Analysis Type: Initial Analysis

Analyte	Analysis Date/Time		Spiked Conc.	Measured Conc.	%R**	Lower Limit (1)	Upper Limit (1)
Mercury	4/19/16	08:36	3.00	3.14	105	90	110

Default Limits (not applicable to MDL Check) **No percent recovery is calculated for MDL checks. The check is simply whether the analyte is detected.

(1) Control Limits: 70-130

Prep:

Into a 1 L volumetric flask, pipetted the following and brought up to volume with Milli-Q H_2O. (2% HNO_3)

Analyte	Final MDL Conc. (ug/L)	Std. ID #	Std. Conc. (mg/L)	Volume (mL) pipetted
Ag	0.2	M12599	1000	0.01
As	2	M12315	1000	0.1
Pb	2	M12313	10000	0.01
Sb	2	M12602	1000	0.1
Se	2	M12600	1000	0.1
Tl	2	M12668	1000	0.1

Of this base standard, pipetted **1 mL** into a 50 mL digestion tube for a digested working standard.

Prep Date:	09/22/2015	Expiration Date:	11/08/2015

Into six, 100 mL volumetric flasks, add the following and bring up to volume with milli-Q H_2O.

Element	Volume Pipetted (mL)	Standard Conc. (µg/mL)	Standard ID	New Conc. (µg/L)
As	1	1000	M12315	10,000
Pb	0.1	10,000	M12313	10,000
Tl	1	1000	M11997	10,000
Se	1	1000	M12600	10,000
Sb	1	1000	M12602	10,000
Ag	0.1	1000	M12599	1000

Into a 1 L volumetric flask, add the following and bring up to volume with Milli-Q H_20. (1% HNO_3)

Element	Volume Pipetted (mL)	Standard Conc. (µg/L)	New Conc. (µg/L)
As	1	10,000	10
Pb	0.6	10,000	6
Tl	2.2	10,000	22
Se	2.4	10,000	24
Sb	2.4	10,000	24
Ag	0.8	1000	0.8

Prep:

Using 1 L volumetric flasks, pipetted the following and brought up to volume using milli-Q H_2O.
(5% HNO_3, 5% HCl)
1000 ug/L Std. - **10 mL** of Custom Assurance Std. #23 (100 mg/L Al, As, B, Ba, Ca, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn) M12558, **10 mL** of Custom Assurance Std. #3 (100 mg/L Ag, Be, Cd) M12530 and **1 mL** of Si (1000 mg/L) M11919.
0.25 ug/L Std. - **0.25 mL** of the 1000 ug/L Std.
0.5 ug/L Std. - **0.5 mL** of the 1000 ug/L Std.
1 ug/L Std. - **1 mL** of the 1000 ug/L Std.
5 ug/L Std. - **5 mL** of the 1000 ug/L Std.
10 ug/L Std. - **10 mL** of the 1000 ug/L Std.
20 ug/L Std. - **20 mL** of the 1000 ug/L Std.
50 ug/L Std. - **50 mL** of the 1000 ug/L Std.
100 ug/L Std. - **1 mL** of Custom Assurance Std. (CAS) #23 and **1 mL** of CAS #3
10,000 ug/L Std. - **100 mL** CAS #23, **100 mL** CAS #3 and **1 mL** of K (10,000 mg/L) M12474.
100k ug/L Std. - **10 mL** of Cu (10,000 mg/L) M12472, **10 mL** of Mn (10,000 mg/L) M12533, **10 mL** of Cr (10,000 mg/L) M12470, **10 mL** Pb (10,000 mg/L) M12313, **10 mL** of Zn (10,000 mg/L) M12005 and **10 mL** of Na (10,000 mg/L) M12010.
100,000 ug/L Std. - **10 mL** of Mg (10,000 mg/L) M12488, **10 mL** of Fe (10,000 mg/L) M12489, **10 mL** of Ca (10,000 mg/L) M12490 and **10 mL** Al (10,000 mg/L) M12400.
500,000 ug/L Std. - **50 mL** of Mg (10,000 mg/L), **50 mL** of Fe (10,000 mg/L), **50 mL** of Ca (10,000 mg/L) and **50 mL** of Al (10,000 mg/L)
1000k ug/L Std. - **100 mL** of Mg (10,000 mg/L), **100 mL** of Fe (10,000 mg/L), **100 mL** of Ca (10,000 mg/L) and **100 mL** of Al (10,000 mg/L)
